

# SB 30

Complete home theatre sound system featuring exclusive HARMAN Wave surround-sound technology and Dolby® Volume with a 200-watt powered wireless subwoofer

Home theatre installations typically involve five loudspeakers, a subwoofer or two, and lots of speaker wire. Not every room can accommodate all that stuff – and not everyone wants to live with it. As a far simpler, more elegant solution, the Harman Kardon SB 30 home theatre soundbar system offers a single wireless subwoofer combined with an extremely advanced loudspeaker that connects directly to your TV, DVD, Blu-ray Disc™ player or game console and works in any room shape and size. Where the SB 30 primarily differs from its predecessors is in terms of its ultra-new and exclusive HARMAN Wave surround-mode technology – which ultimately delivers a compelling surround-sound experience from 13 transducers fed by 11 amplified channels. A classic overachiever, the sleek SB 30 soundbar exceeds expectations, delivering immersive, peak-performance sound for your films, TV shows and games. All from a system you barely know is there.

## Features

## Advantages

## Benefits

Complete home theatre sound system	Includes every component you need to get started. Simply add your TV, Blu-ray Disc™ or DVD player to the mix to complete the surround-sound experience	More realistic, impactful sound for music, TV and film soundtracks No complicated installation required, works out of the box
HARMAN Wave surround mode	An exclusive technology that delivers an extremely realistic surround-sound experience using advanced digital signal processing (Triple DSP) and 13 transducers fed by 11 amplifiers	Superb audio Minimized clutter since all the speakers fit inside one sleek soundbar Works for all the listeners in the room
Dolby® Volume	This built-in technology helps you maintain the same volume level – no matter which channel, program or commercial you're watching	More seamless entertainment experience Greater volume control
Sleek soundbar speaker	Delivers a compelling surround-sound experience from a sophisticated, single, compact unit	High-quality, high-performance audio Space-saving design Décor-friendly
Wireless powered subwoofer	A wireless 200mm (8") woofer delivers notable bass impact and exceptional immersion for whatever movie or TV show you're watching	No unsightly wires between soundbar and subwoofer Offers more placement options
User-adjustable surround energy function for surround modes	Gives the listener ultimate control over sound in three separate listening environments: small, medium or large rooms	Empowerment for the user/listener Works in any room shape and size Flexibility
Virtual mode that works with stereo and multichannel sources	This configuration enlarges the sound field, the apparent source width and the depth of the perceived soundstage	Increases playback performance, expands listening options
Stereo mode with equalisation and filtering in the digital domain	A very coherent, smooth, uniform sound field, independent of listening angle	Increases listening experience flexibility
Optical and coaxial digital inputs and analogue inputs	Lets you connect your TV, disc player or satellite or cable tuner to the system to expand your entertainment experience	Expanded listening/viewing options Versatility
IR remote control	The SB 30 system includes a small remote control, which conveniently has power over all soundbar functionality	Helps eliminate coffee-table clutter Convenience
Magnetically shielded speakers in the soundbar	Allows the soundbar to be placed next to any type of TV without causing picture interference, which gives you flexibility when setting up your system	Flexibility Uninterrupted viewing

# SB 30

Complete home theatre sound system featuring exclusive HARMAN Wave surround-sound technology and Dolby® Volume with a 200-watt powered wireless subwoofer

Features	Advantages	Benefits
Dual-position EQ switch	Whether you place the soundbar on a tabletop or mount it on a wall, this switch helps optimise its performance by delivering a more natural-sounding bass	Uncompromised performance Increases placement options
Down-firing bass-reflex subwoofer	Offers greater bass output so you can feel like you're part of the action on screen	More realistic, immersive entertainment
Automatic turn-on circuit	The system automatically turns itself from "standby" to "on" once you start playing a disc or another connected source	Convenience Saves energy
Subwoofer volume, crossover and phase controls	Gives you control over the subwoofer's ultimate performance in diverse locations with different listening dynamics	Greater flexibility Helps deliver the high-quality sound you expect
Wireless code switches	Allows you to change the RF channel to avoid interference with other RF devices	Better, high-quality picture Lets you run multiple SB 30 systems at the same time in the same home
Wall-mounting hardware (included)	Gives you the option of mounting your soundbar underneath your flat-screen TV, depending on your room configuration	Convenience Installation flexibility
Dolby™ Digital decoding	Allows you to properly experience the various Dolby-encoded film soundtracks	Experience detailed spatial realism from playback sources
DTS® decoding	Allows you to properly experience the various DTS-encoded film soundtracks	Experience detailed spatial realism from playback sources
