## Virax Soft Touch® innovation

In addition to visually emphasize the hand's position on the tool, the Soft Touch® coating provides you with the best grip. On tools such as the PC42, it makes the tool easier to hold in the palm of your hand, and prevents cutting fatigue. On the ZR35, it enables to increase the torque applied to the slide, reducing fatigue and providing more accuracy when used. Pre-qualification and endurance tests have been carried out to determine the best combination between nuance – hardness – grain for the Soft Touch®.
