

United Air Specialists, Inc.

a CLARCOR company

SFC SERIES

DOWNWARD FLOW CARTRIDGE DUST COLLECTOR

Clean air. It's what we do.™

SFC SERIES

A REVOLUTIONARY APPROACH TO industrial dust COLLECTION.

Welcome to a revolution in industrial air cleaning. Because now the experts at United Air Specialists — the leader in air quality technology for 40 years — bring you our most innovative dust collector yet . . . the SFC Series.

SFC is our newest downward flow cartridge dust collection system. With its patented pulse cleaning technology, greater air capacity and quick and easy maintenance, there's no better air filtration method for your manufacturing facility.

Our SFC unit removes harmful pollutants resulting from common manufacturing processes — such as grinding, welding, buffing and sanding. The result: a safer, cleaner environment for your employees. By using our SFC unit, you're virtually eliminating air quality concerns in the workplace. Plus, you're ensuring increased employee productivity, fewer absences and illnesses, more efficient cleaning, and significant operational savings.

A WIDE RANGE OF APPLICATIONS

The high-performance SFC unit is ideal for all your dust collection needs. Filtering out the polluted air that commonly occurs within a manufacturing environment, SFC's many industrial applications include grinding, welding, buffing, sanding, smelting, powder bulking, and more. Plus, our design allows for field expandability — so you can add modules and increase the capacity of your system at any time.

U.S. Patent No. 6,902,592.

Clean air. It's what we do.™

PATENTED PULSE CLEANING TECHNOLOGY

At the heart of the SFC system is the industry's most advanced pulse cleaning system technology. In designing the SFC unit, UAS engineers used Computational Fluid Dynamics computer modeling to develop the most effective system that "pulses off" dust from the filter — greatly improving the cartridge cleaning power. Utilizing an optimized "diverging isothermal flow" nozzle and venturi, air is pulsed at a precisely calculated distance through an unobstructed airway. The result: Increased pulse cleaning energy, lower pressure drop and longer cartridge life. Plus, our patented pulse system cleans the full length of the cartridge. These unique, proprietary features assure years of dependable, efficient and cost effective performance.

EXTENDED CARTRIDGE LIFE WITH MORE POWER & LESS ENERGY

Unlike competitors, the SFC system uses external filter tracks to support the filters instead of "yokes" that interfere with cleaning. This allows for unobstructed airflow and increased cleaning power with less energy. By designing the SFC with optimized cabinets that broaden the space between cartridges and sidewalls, we ensured lower velocities and reduced cartridge abrasion. The result: dramatically increased cartridge life.

PULSE BLAST BENEFITS

FEWER PULSES are needed to clean the cartridge filters, so less compressed air is used. This is a substantial cost savings for the customer over the life of the unit.

FILTER LIFE IS INCREASED because fewer pulse cycles mean less stress on the filter media. This equates to less frequent filter changes and significant reduction in operating costs.

UNOBSTRUCTED AIRFLOW means there is more cleaning energy delivered to the filters to clean the entire length of the cartridge filter.

OPTIMIZED CLEANING provides maximum filter efficiency with the lowest possible outlet emissions.

At any point along the cartridge filter, the SFC unit provides 25% greater pulse cleaning power vs. competition.

FEATURES AND BENEFITS

Heavy-duty Lifting Lugs

Ensure safe and secure reinforcement during installation.

Modular Design

Provides flexibility to increase unit capacity by adding modules at your facility.

Optimized Cartridge Cleaning System

Springless pulse valves and patented nozzle/venturi offer maximized cleaning power.

QUICK AND EASY MAINTENANCE

With one simple movement of the handle, the SFC's "Quickseal" release door provides extremely fast filter removal and maintenance.

Powder Coated Finish

All components have electrostatically applied paint that prevents fading and chalking.

Horizontal Filters

Enable cartridge rotation and limits dust release when replacing filters.

Heavy-duty Supports

Designed and manufactured to meet Seismic Zone 4 and 100 mph wind load structural rating.

10-YEAR WARRANTY

Clean air. It's what we do.™

CARTRIDGE FILTERS

Engineered with a variety of application-specific filter media, all SFC filters provide high filtration efficiency and long filter life. UAS' SFC cartridge filters are compatible with virtually every major brand of downward flow cartridge dust collectors. This ensures increased flexibility and lower maintenance costs. Our wide range of filters includes:

Cartridge Filter Type	Description	Max. Temp.	General Usage	Typical Application
Standard (Supra-Net)	High-efficiency	180° F	For most applications.	Abrasive blasting, carbon black, powder paints, dry chemical processing, pharmaceuticals, etc.
Fire Retardant (Supra-Net-FR)	High-efficiency treated to be fire retardant	180° F	For applications where live sparks could enter the dust collector.	Welding, flame cutting, plasma cutting, laser cutting, metal spraying, ferrous metal grinding, etc.
Wide Pleat (Supra-Fibrous)	High-efficiency with wide spacing for better dust release	180° F	For applications where larger or irregularly shaped particles may enter the collector.	Fiberglass and composites grinding, leather finishing, grain handling, buffing, tobacco processing, wood sanding, etc.
Wide Pleat Fire Retardant (Supra-Fibrous-FR)	High-efficiency with wide spacing for better dust release, treated to be fire retardant	180° F	For applications where live sparks or irregularly shaped particles may enter the dust collector.	Coarse grinding of ferrous metals, etc.
Washable (Supra-Fibrous-FW)	High-efficiency with wide spacing that includes special washable media	275° F	For applications with larger particles or with hygroscopic or agglomerative dusts. Filter can be washed and reused.	Salt, sugar, clay, cocoa, coffee, detergents, milk powder, stearates, etc.
Spun-Bond (Supra-Release-P)	High-efficiency, proprietary blend of spun-bond polyester fibers	245° F	For applications where high strength media and excellent release characteristics are required.	Cardboard, cement, cocoa, coffee, paper, rubber grinding, etc.
Spun-Bond PTFE (Supra-Release-T)	High-efficiency, proprietary spun bond polyester substrate with a Teflon surface membrane	245° F	For applications demanding extremely high filtration efficiencies or difficult dust cake release requirements.	Food, asbestos, pesticides, fluidized bed dryers, agglomerating materials, etc.

OPTIONS AND ACCESSORIES

- **Air Safety Filters** — used when air is recirculated into the plant or when collecting hazardous dusts, ensuring that clean air is continuously discharged from the unit.
- **Explosion Relief Vents** — minimize damage and provide a degree of personal protection in the unlikely event of an explosion that may result when collecting explosive dusts.
- **Abrasive Inlet** — prevents filter media damage when collecting highly abrasive dusts.
- **Bag-In/Bag-Out Option** — provides clean, safe, easy removal of fine, hazardous or difficult-to-handle dusts.
- **Blower Silencer Package** — duct-type silencer reduces unit noise level to 80 dBA or less under normal operating conditions.

• Other Add-Ons

- After-Filters
- Fans
- Leg Extensions
- Drum Lid Latch Kit
- Bin Vents
- Short Drums
- Drawer Base
- Steep Sided Hoppers
- Stainless Steel Construction
- Service Platforms
- Control Panels
- Photohelic® Gauge Controls
- Pneumatic Valve Assemblies
- Hopper Access Doors
- Sprinkler Heads
- Thermal Protection Kits

Other options and accessories available. Contact UAS for assistance.

SFC8-2 and Larger with Drum (H55)

Short Drum (SD) units available in SFC 8 and larger. Subtract 16" from height.

WHY CHOOSE UNITED AIR SPECIALISTS?

A world-renowned reputation. For 40 years we've been the industry leader in air quality technology — a proven track record that speaks for itself.

Commitment to quality products. Measuring our quality against documented expectations, we practice continuous improvement methods to anticipate challenges and implement successful solutions.

Unparalleled customer support. As a customer-driven solutions provider, we earn credibility and establish successful relationships by exceeding expectations for professional service and attitude.

Innovative technical leadership. Always, we keep technology at the forefront — ensuring continuous product advancements through ongoing investments in design and manufacturing.
