PowerTrap®

MODEL GT10L

COMBINATION PUMPING AND TRAPPING SECONDARY PRESSURE DRAINER

Benefits

Pump/trap with built-in steam trap for a wide range of applications: drainage of low capacity heat exchangers, flash steam recovery systems and reservoirs, often operating under vacuum conditions.

1. No cavitation or seal leakage.
2. Non-electric design with durable nickel-based alloy compression spring for reliable performance.
3. Pump will operate with a low filling head (min. 12″).
4. Easy, inline access to internal parts simplifies cleaning and reduces maintenance costs.
5. Intake/exhaust valve heads are both Rockwell 65C with 45C seats for maximum durability.
6. High quality stainless steel internals ensure reliability.
7. Compact design permits installation in a limited space.
8. Float resists hydraulic shock to 1500 psig.
9. 2-year warranty for snap-action mechanism.*

Specifications

Model			GT10L	
Connection	Pumped Medium Inlet & Outlet		**Screwed and Flanged***	**Screwed**
	Motive Medium & Pump Exhaust		Screwed	
Size (in)	Pumped Medium: Inlet × Outlet		**1 × 1**	**1½ × 1**
	Motive Medium Inlet		½	
	Pump Exhaust Outlet		½	
Maximum Operating Pressure (psig)		PMO	150	
Maximum Operating Temperature (°F)		TMO	365	
Maximum Allowable Pressure (psig)		PMA	Cast Iron: 230 Cast Steel: 300	
Maximum Allowable Temperature (°F)		TMA	428	
Motive Medium Pressure Range (psig)			5 – 150	
Maximum Allowable Back Pressure			7 psi less than motive medium pressure used	
Volume of Each Discharge Cycle (gal)			approximately 1.6	
Motive Medium**			Saturated Steam	
Pumped Medium***			Steam Condensate	

* For details of flange connection, see picture at bottom right

Connections and sizes in bold are standard

** Do not use with toxic, flammable or otherwise hazardous fluids.

*** Do not use for fluids with specific gravities under 0.85 or over 1, or for toxic, flammable or otherwise hazardous fluids.

⚠ CAUTION To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

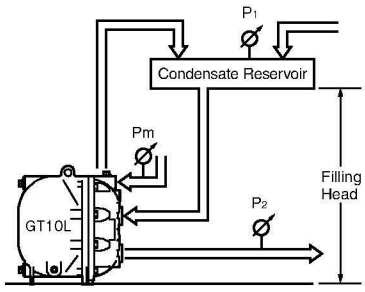
• Correction Factors

For GT10L installed with filling head other than 25″ (minimum filling head: CK3MG: 18″, CKF5M: 12″)

Filling Head from Grade	Inlet Pipe & Check Valve Size		
	1½″ CK3MG	1″ CK3MG	1″ CKF5M
55″	1.30	1.50	1.37
43″	1.27	1.35	1.28
37″	1.23	1.25	1.21
31″	1.15	1.15	1.12
25″	1.00	1.00	1.00
22″	0.90	0.85	0.93
18″	0.60	0.60	0.81
12″	—	—	0.59

• Illustration of Filling Head and Pressures



The discharge capacity is determined by the motive medium, motive medium pressure (Pm) and back pressure (P_2).

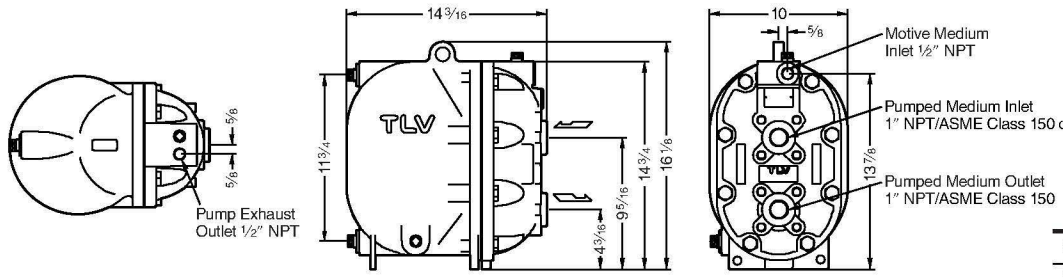
Make sure that:
Discharge Capacity × Correction Factor > Required Flow Rate

NOTE:

- A check valve must be installed at both the pumped medium inlet and outlet. To achieve the above capacities with the standard GT10L configuration, either TLV check valves CK3MG (inlet & outlet), or CKF5M (inlet) and CKF3M (outlet) must be used. depending on connection type.
- Motive medium pressure minus back pressure must be greater than 7 psi.
- A strainer must be installed at the motive medium and pumped medium inlets.

Dimensions

Units: inch



Note: All Plug Holes 1/2" NPT

Weight (lb)

Cast Iron	101
Cast Steel	110

Size of Reservoir

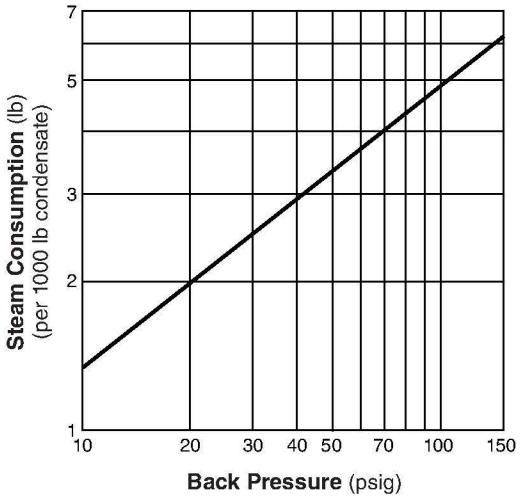
The reservoir must have a capacity sufficient to store the condensate produced during the **PowerTrap** operation and discharge.

Reservoir Dimensions (flash steam is not involved)

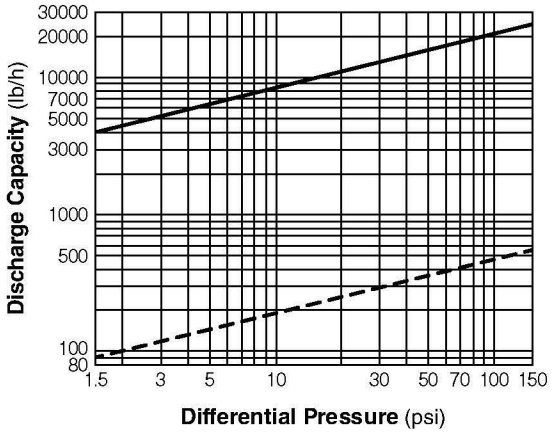
Amount of condensate lb/h	Reservoir diameter (in) and length (ft)						
	1½	2	3	4	6	8	10
500 or less	3.0 ft	2.0					
700	4.0	2.5	1.0				
1000	5.5	3.5	1.5				
1200		4.5	2.0	1.0			
1500			2.5	1.5			
2000			3.5	2.0			
3000			4.5	3.0			
4000			6.5	4.0	1.5		
5000				5.0	2.5		
6000				5.5	2.5	1.5	
7000				6.5	3.0	1.5	
8000					3.5	2.0	
9000					4.0	2.5	1.5
10000					4.5	2.5	1.5
12000					5.0	3.0	2.0
14000					6.0	3.5	2.5
16000					6.5	4.0	2.5
18000						4.5	3.0
20000						5.0	3.5

Reservoir length can be reduced by 50% when the motive pressure (Pm) divided by the back pressure (P_2) equals 2 or greater (when $Pm \div P_2 \geqq 2$).

Steam Consumption (Motive Medium)



GT10L Steam Trap Discharge Capacity



——— : Capacity of GT10L as a steam trap ($P_1 > P_2$). Instantaneous condensate loads above the rated trap capacity will cause the pump to cycle and therefore reduce the discharge capacity.

- - - - : Minimum amount of condensate required to prevent steam leakage.

1. Capacities are based on continuous discharge of condensate 11 °F below steam temperature.
2. Differential pressure is the difference between the inlet and outlet pressure of the trap.

⚠ CAUTION DO NOT use this product under conditions that exceed maximum differential pressure, as condensate backup will occur!

System Package

Single System Package Type M1L

Discharge Capacity: see discharge capacity column **A** (no correction factor required)
Tank Size: 6.7 gal
Weight: approx. 288 lb (dry)
Other tank sizes and connections available

⚠ CAUTION DO NOT DISASSEMBLE OR REMOVE THIS PRODUCT WHILE IT IS UNDER PRESSURE. Allow internal pressure of this product to equal atmospheric pressure and its surface to cool to room temperature before disassembling or removing. Failure to do so could cause burns or other injury. READ INSTRUCTION MANUAL CAREFULLY.
