

Separated Linen Conveyor System

LinenStream™

CHICAGO®

CHICAGO'S INTELLIGENT CONVEYOR SYSTEM

LinenStream is Chicago's intelligent conveyor system for the distribution and flow control of separated linen from the Chicago LinenStream™ Automatic Linen Separator. The conveyor receives individual pieces of separated linen directly from the Cascade. It then advances linen along the length of the LinenStream conveyor, controlling workflow to the operators who are loading a high speed spreader/feeder (such as the Chicago Edge™ series), or manually feeding linen into a flatwork ironing system.

Chicago Linen Feeding System consisting of Cascade and LinenStream

LinenStream's built-in electronic control system automatically adjusts the flow of ready-to-feed linen advanced to operators to match the supply of separated linen received from Cascade, as well as the speed and ability of the operators handling linen at the end of the LinenStream system. LinenStream starts, advances, accelerates, slows down and stops linen flow as necessary to match current finishing line conditions so that production is not interrupted because too much or too little separated linen is available.

LinenStream

Dimensions and Utilities

NOTE:

1. Specifications subject to change without notice. Consult factory for certified construction floorplan.
2. Millimeter dimensions are in [].
3. All dimensions are +/- 1/2".
4. Utility connections are located as shown.
5. Floor plans show standard 8' [2440] length

Available in 6' [2440], 10' [3050] or 12' [3650] lengths, and custom configurations.

A Configuration for Every Laundry

LinenStream conveyors may be set up in a variety of lengths and configurations to match a laundry's floor space requirements, equipment and work flow. Standard 8' (2440mm) model is usually suggested for use with Chicago Edge Maxx, King Edge Vac or Edge. Consult factory for other conveyor lengths, suggested floor plans and configurations to suit specific needs or floor space.

Visit Chicago's website www.chidry.com for easy access to the latest floorplans, technical specifications, etc.

A Complete Range of Separating, Feeding, Ironing, Folding, and Sorting Options

Because Chicago specializes only in flatwork finishing equipment, it can offer the world's widest range of high production separating, feeding, ironing, folding and sorting equipment. Complete flatwork finishing systems range from automated multi-roll systems producing over 2000 pounds per hour, to compact ironers for small on-premise laundries.

Chicago's performance record is unmatched in tens of thousands of installations in commercial, hospitality, health care, textile rental, and institutional laundries. An experienced Chicago professional will be pleased to make an objective equipment recommendation based on your

production, space, utility and budget requirements. All equipment is designed and built in Chicago for complete quality control and prompt service and parts availability, including overnight delivery if necessary.

Contact your local Chicago distributor or the factory sales assistance office for a no-obligation analysis of your needs. Visit our newly redesigned and now mobile-friendly website www.chidry.com for easy access to current product brochures, detailed floor plans, and specifications, as well as videos of select Chicago products in action.
