

PA419-Q2
shown

Bluetooth PA — PA419-02

This is the first portable PA made to feature Bluetooth & NFC (Near Field Communication) for quick and easy wireless audio streaming. In addition to wireless voice amplification for two presenters at the same time, a computer or projector can also be connected for multimedia presentations.

With the voice priority of the PA419-02, making announcements through a connected microphone automatically mutes any music that's being played. Three seconds after the speaking stops, the music will return to its previous level.

The PA419-02 runs on AC power or its rechargeable lithium battery (20% lighter than lead-acid batteries), and plays for at least 2.5 hours on a single charge.

The speaker comes with a choice of two or one handheld wireless mics, a hands-free beltpack transmitter with headset mic, or speaker only.

PA419-Q2 with two Q319 wireless mics \$1722.60

PA419M with M319 beltpack transmitter & HBM319 mic \$1544.40

PA419Q with one Q319 wireless mic \$1545.20

PA419-02 speaker only \$1403.20
