

ESD POS System

ESD's Point of Sale Hardware and Software is Designed for Retail Laundry and Dry Cleaning Operations to Manage Drop-Off Business, Retail Sales, Inventory Control and Employee Attendance

The ESD POS System is a package that includes both Hardware and Software. ESD's POS System allows an operator to manage all aspects of their business from drop-off laundry, dry cleaning, alterations, over the counter sales, inventory control, and employee attendance. With the easy to use POS touch screen, operation, order entry, customer information, and detailed order instructions are entered into the system in just seconds. The POS is completely bi-lingual and allows the operator to choose between English or Spanish displays. The POS System features user-friendly icons throughout, making it intuitive and the easiest to use in the industry.

Inventory control and retail product sales utilize a bar-code scanner and with the optional digital drop-off scale, orders can be tracked by the ounce. The thermal receipt printer prints in triples for drop-off orders so that the customer can be provided with all relevant details. POS comes standard with a lockable, secure cash drawer and pin-number activated system. This makes it possible to track every dollar in the store touched by an employee.

**Computer, Monitor, Cash Drawer
Display Tower and Software — 11-900-022
Add Credit Card Acceptance — 11-900-023
Add Electric Scale — 11-900-029**
