Portable Speaker with Bluetooth® Wireless Technology

Plug-and-play technology makes for easy-to-play podcasts and audio streaming. This 30-watt speaker easily fills a large room with wireless sound for up to 300 people. And with its dedicated Bluetooth mic, the PABT30 can also be used for voice amplification. The speaker includes a USB charging port and auxiliary line input for expanded device compatibility.

PABT30 \$198.00

Array Speaker

Our next generation powered speaker offers classrooms flexibility in deciding how or where to enhance audio. Our array speaker targets a narrower band of sound at the students without bouncing off of walls, which can create unwanted background noise.
