

Megaphones

Sometimes, communicating to large groups of people is critical – other times convenient. Whether on the athletic field, for tour groups, or in emergency response situations, you can rely on being heard through these Califone megaphones. These models offer new technology with new ways to connect and transmit external audio for playback.

These models deliver maximum voice amplification in easy-to-carry sizes. Their remote mic can record a ten-second message for auto replay. The megaphones include a shoulder strap and adjustable volume control with talk and siren capabilities.

PA25R 25 Watts \$140.00 (not shown)
PA20R 20 Watts \$132.20

This 15-watt megaphone delivers your message up to 1,000' away. Built to use in any weather, it is dependable in emergencies and drills. There is volume control for both voice and emergency alert.

PA-15 \$115.00

For smaller campuses, sporting events, or other outdoor activities, try the 8-watt portable megaphone. Folding handle for maximum portability; adjustable volume with talk and siren capabilities.

PA8 \$95.00

Assistive Listening

English language learners are still the fastest growing segment of students in US public schools. These wireless listening systems are ideal for these students who require additional language development support. They are also handy for tour groups. The hip or neck-worn 16-channel transmitter can be used with any number of matched receivers.

You can also pair them together to convert your existing wired PA system to wireless (up to 300' range) or even upgrade outdated 700MHZ PA's to comply with revised FCC guidelines.

Wireless Listening Systems

WS-R Receiver

3.5mm headphone jacks allow two listeners to use this receiver simultaneously. This wireless audio system receiver also integrates the ASHA-recommended 85dB volume maximum for hearing safety allowing you to protect student hearing. To upgrade a wired PA, use one of the plugs to connect to the PA for instant wireless connectivity. **WS-R** \$200.80

WS-T Transmitter

You can broadcast to any size group with the separate mic and line inputs in this transmitter. It also provides the flexibility for assistive listening, installed, or mobile applications. **WS-T** \$177.60

WS-CK1
