## Spirit™ Card Reader & the original Spirit™

More rigorous learning standards now require that all teachers, not just ELA teachers, share responsibility for student literacy. ELA standards outline expectations and require increasingly complex nonfiction texts as students get older.

Teachers depend on the Spirit family, the leading player/recorders, to support literacy lessons and reading practices in all areas of core content. Teachers appreciate the Spirit's dependability and flexibility in listening centers where it can be used for audio book read-alouds in independent study, small groups, differentiated instruction or whole-class learning.

The Spirit SD supports many different formats: AM/FM cassette, CD player and even USB & Card Reader (1886 only). The Spirit has proven itself in the classroom and can be used for ELL/ELD language acquisition activities and foreign language instruction in addition to literacy applications. A built-in microphone records student responses and helps teachers monitor student progress. Rugged ABS plastic and recessed speakers prevent accidental damage in busy classrooms.

**1886PLC-6** Six person Spirit Listening Center (includes foam-lined storage case, 1210AVPS jackbox, six 3068AV headphones) \$415.00

**1886PLC** Four person Spirit Listening Center (includes foam-lined storage case, 1210AVPS jackbox, four 3068AV headphones) \$378.80
