

ARTICULATED TELESCOPIC HANDLER | TM320

Gross power: TM320: 125 hp (93 kW), Lift capacity: 6390 lb (2898 kg), Lift height: 17'1" (5,200 mm)

STRENGTH YOU CAN RELY ON.

THE TM320 IS DESIGNED AND BUILT WITHOUT COMPROMISE TO PROVIDE ALL THE STRENGTH AND POWER YOU NEED IN AN ARTICULATED MACHINE.

Proven reliability.

- 1 JCB machines are stress-tested over the equivalent of a lifetime of cycles, under the most arduous digging and dumping situations.
- The centrally mounted lift, tilt and extension rams eliminate boom twisting, while centrally-mounted keyhole castings enhance the structural integrity.
- JCB manufactures its own hydraulic cylinders, cabs, axles, transmissions and engines—all designed to work in perfect harmony for optimal reliability.
- 4 For long-term corrosion protection, cabs and bodywork panels are dipped in electrophoretic alloy prior to painting.

STRENGTH YOU CAN RELY ON

Designed to work hard.

- A heavy-duty center joint absorbs vertical and horizontal load stress, for maximum durability and rigidity.
- The boom is mounted into a heavy-duty loader tower and features an inverted-U profile and fully welded closing plates for exceptional strength.
- The cast rear counterweight helps prevent impact damage. Recessed rear lights mounted above the counterweight are well protected.
- B Hydraulic hoses are routed within the main boom structure to guard against damage.

Wide core cooling pack with optional hydraulic reverse fan to eliminate debris build-up; the fan can be set to manual or automatic.

THE **POWER** TO PERFORM.

THE TM320 IS EQUIPPED WITH THE SUPERB JCB ECOMAX ENGINE AND OFFERS 17'1" LIFT HEIGHT, 9'8" FORWARD REACH AND CLASS LEADING LIFT CAPACITY AND TEAROUT FORCE.

JCB EcoMAX engine.

The JCB TM320 features the JCB EcoMAX Tier 4 Final engine with variable geometry turbo. This 4.4 liter engine delivers a massive 405 ft lb torque at low engine speeds for optimum response and improved cycle times and tractive effort.

Traction and travel.

- With 4WD as standard, and optional limited slip differential, the JCB TM320 provide exceptional traction and performance on soft, muddy ground.
- For improved load retention, comfort and productivity, the TM320 are equipped with JCB's Smooth Ride System (SRS).

SRS can be auto-engaged while traveling at speeds exceeding 4 mph (6 kph), manually engaged via a rocker switch (with the boom in any position), or constantly activated.

THE **POWER** TO PERFORM

Hydraulics and versatility.

- The ability to change flow rate on the go is perfect for straw spreader or sweeper use, while the second boom auxiliary option accommodates a wide range of twin auxiliary attachments.
- Available LED work light packages include boom and cab-mounted forward options, and a rear-mounted hitch light, for enhanced visibility and productivity at night and in dark operating environments.
- For easier connection to attachments and accurate placement of loads, the JCB TM320 feature side-shift functionality.

- An optional hydraulic rear tow hitch further increases machine versatility. The tow hitch features a fold-up design to prevent impact damage and grounding when working on uneven ground.
- The foot brake features a selectable transmission dump for superb multi-functioning control and increased engine speeds during loading or rehandling.
- The TM320's variable flow auxiliary hydraulics are easy to use and designed to maximize productivity and efficiency. This flow sharing system, with a variable flow piston pump, allows multiple functions to be performed simultaneously.

IN CONTROL, IN COMFORT.

THE JCB TM320 IS EASY TO OPERATE—THANKS TO ERGONOMIC, INTUITIVE CONTROLS AND INTELLIGENT FEATURES—AND PROVIDE A COMFORTABLE WORKING ENVIRONMENT FOR INCREASED PRODUCTIVITY.

At your command.

- 1 From a high, centrally mounted driving position JCB TM320 operators enjoy the benefit of a low boom pivot point and large glass areas for an unobstructed 360-degree view.
- Constant flow hydraulics are intuitive to use. With an in-cab flow rate display, hydraulics can be adjusted on the go.
- Manual and automatic transmission modes provide the operator with control of transmission performance.
- For fast and precise control, the TM320 are fitted with a fully-proportional, single-lever servo joystick control. Operators can change gears, speed and direction quickly and easily with one ergonomically-designed joystick.
- The HVAC system allows operators to stay comfortable and focused for longer. A 3-speed fan heater is fitted as standard; optional air conditioning makes it even easier to set an ideal cab working temperature, regardless of outside weather conditions.

IN CONTROL, IN COMFORT

Sitting comfortably.

- The cab is large and roomy, with plenty of convenient storage for work essentials and personal property.
- Boom-end damping on lower and extend/ retract reduces shock to the operator and the machine itself.
- A color, LED dashboard relays useful operating information including in-cab daily checks, fuel consumption data, diesel exhaust fluid (DEF) levels and hydraulic flow rate.
- Backlit switches ensure quick and accurate control recognition, even in the dark.

SERVICING MADE EASY.

THE TM320 IS EASY TO MAINTAIN AND SERVICE, WHICH MEANS LESS DOWNTIME.

Maintenance made easy.

1 The JCB TM320 use a sealed-for-life SCR system, requiring no costly diesel particulate filter (DPF) to comply with Tier 4 Final legislation.

The diesel and DEF (diesel exhaust fluid) tanks, as well as all daily check points, are easily accessible from ground level.

The wide-core, single-faced cooling pack delivers excellent performance. A cyclonic air cleaner reduces debris build-up in the air filter and an air intake scavenge system removes debris, extending service intervals. An automatic reversing fan is available to further simplify the clearing of debris.

The TM320's wide-opening rear engine cover provides clear access to service points. Grease points are easily accessible, and no tools are required to access the battery.

The TM320's self-lubricating boom wear pads and dry boom lubrication provide virtually maintenance-free operation. The use of graphite-impregnated bronze bushes throughout allows greasing intervals to be extended to 500 hours.

SERVICING MADE EASY

Keeping you safe.

- 4 Access steps are inclined and equally spaced, and well-positioned grab handles provide three points of contact at all times.
- 5 Hose burst check valves on the rams prevent collapse in the event of hose failure.
- The low boom profile and low boom pivot make for superb forward visibility.
- 7 An in-cab, electronic, two-stage quick hitch isolation control protects against accidental release of attachments.
- For real time vehicle tracking, the TM320 are equipped with JCB LiveLink telematics.

A SMART INVESTMENT.

JCB MACHINES ARE RECOGNIZED AROUND THE WORLD FOR LOW OPERATING COSTS AND EXCEPTIONAL RESALE VALUES.

EcoMAX saves you money.

- Innovative Clean Burn technology allows
 JCB engines to meet Tier 4 Final regulations
 without a diesel particulate filter (DPF) and therefore
 without the productivity and cost impacts of DPF
 regeneration and DPF replacement. Instead,
 the JCB engines in the TM320 use a sealed-for-life
 Selective Catalytic Reduction (SCR) system.
- The TM320 are equipped with torque converter locking in fourth, fifth and sixth gear for increased speed, quicker journey times and reduced fuel consumption.

A SMART **INVESTMENT**

- By producing high power and torque at engine speeds as low as I300–I400 RPM, the JCB EcoMAX engine provides fuel-efficient matching of transmission and hydraulics.
- The I25 hp (93 kW) EcoMAX engine fitted with a variable speed cooling fan or hydraulic reversing fan with manual override that automatically adjusts to ambient temperatures, for optimal fuel efficiency and reduced in-cab noise.
- High back-off power brakes reduce viscous drag during roading and rehandling, for improved fuel economy.
- The TM320's load-sensing hydraulics consume power only on demand, to reduce fuel consumption.

LIVELINK, WORK SMARTER.

LIVELINK IS AN INNOVATIVE SOFTWARE SYSTEM THAT LETS YOU MANAGE YOUR JCB MACHINES REMOTELY FROM A COMPUTER, TABLET OR SMART PHONE.

Productivity and cost benefits—By providing information like idle time monitoring and machine fuel consumption, JCB LiveLink helps reduce your fuel usage, saving money and improving productivity. Machine location information can help improve efficiency and possibly reduce insurance costs.

Maintenance benefits—Accurate hours monitoring, maintenance history records, critical machine alerts and service alerts for improved maintenance planning.

Security benefits—Real-time geofencing allows you to set operating zones, while curfew alerts let you know when your machinery is operated outside of predetermined times. Location information helps to plan and monitor the safe storage of your machine.

VALUE ADDED.

WHATEVER YOU NEED AND WHEREVER YOU ARE, JCB'S DEPENDABLE NORTH AMERICAN DEALER NETWORK IS HERE TO MAKE SURE YOUR MACHINERY PERFORMS TO ITS FULL POTENTIAL.

1 JCB Technical Support Service provides instant access to factory expertise, day or night.

JCB's Finance team is always on hand to provide fast, flexible, competitive quotes.

JCB Yellow Shield offers comprehensive extended warranties and service agreements, as well as serviceonly or repair and maintenance contracts. JCB maintenance teams offer competitive labor rates and no-obligation quotes. The global network of JCB Parts Centers is a model of efficiency. With 16 regional bases, we can deliver around 95 percent of all parts anywhere in the world. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

Note: JCB LIVELINK and JCB ASSETCARE may not be available in your region, so please check with your local dealer.
