Hako – Quality pays off

Hako means TÜV-certified top quality

At Hako, we already focus on customer benefits at the early stages of designing new products. Increased productivity, heavy-duty design, ease of use and maintenance, excellent performance and a long service life are just some of the topics that define our actions and ensure long-term trouble-free operation of our machines. It is our target to keep our customers as satisfied as possible.

That is why Hako implemented a quality management system in line with DIN EN ISO 9001 years ago as one of the first companies in the industry. Modern production plants and highly qualified employees are further key elements of our steadily growing corporate success.

Sweepers and vacuum-sweepers

Reliable cleaning of company premises from 2,300 to 16,200 m² cleaned/hour

Ideal for cleaning company floors and grounds: sweepers and vacuum-sweeper machines made by Hako. Both the hand-operated and ride-on sweepers ensure dust-free cleanliness, e. g. in small and large warehouses, various types of factory halls, outdoors in the car park or indoors in the underground car park!
