BRETFORD

The Bretford Mobility Carts for MacBook

Store, secure, charge, and transport up to 20 or 30 MacBook®, MacBook Pro laptop computers

Configure to Your Needs.

The new Mobility Cart for MacBook allows you to store, secure, charge, and transport any combination of MacBook and MacBook Pro computers in your classrooms. Now available around the world, the new Mobility Cart is smaller, cleaner, and smarter than ever before.

Intelligent Charging.

The all new Power Management System, located on top of the cart, features a charge indicator light, which glows orange when charging, and turns to green when all your MacBooks are charged. Two charging modes give you the ability to properly charge the entire cart, or with the touch of a button, apply a rapid charge to just the first ten

computers. Smarter charging cycles focus charging power on the devices that need it most, letting your charged devices stay cool, extending battery life, and saving on energy costs.

Cables without Clutter.

The new Mobility Carts feature doors in front and back, with separate programmable combination locks for each, allowing you to secure your power adapters separately from your devices. This design creates a cleaner and more secure solution. Laser-cut numbers and an all-new cable

management slide-lock in the front help keep your devices and power cords in the right slot, while matching laser-cut numbers in the back keep your devices connected to the appropriate power

adapter. Custom-fit power adapter slots accommodate all models of MagSafe® power adapters.

Easier to Maneuver.

One of our goals in this redesign was to make our carts easier to move around your classroom and campus. We did this by reducing the size by 20 percent, and by adding all new locking swivel casters. Two casters swivel and lock to keep your cart in place, while the other two can swivel, or by flipping an easy toe-tab, lock straight for your long trips across the building. These all-new casters have passed our rigorous cycle testing, passing through a typical school double-door threshold 10,000 times without failing.

Technical Specifications

- 12-year warranty for the cart
  3-year warranty for electrical components.
- All steel construction with non-toxic aluminum and white powder-coat finish.
- Ships fully assembled.
- Ships Capacity: 20 or 30 MacBook, MacBook Pro (13, 15, or 17-inch models, not included).
- Dimensions (W x D x H)
  - 83 x 60 x 94 cm for 20
  - 99 x 60 x 94 cm for 30

What's in the Box

- Mobility Cart fully assembled
- Accessory Case
- 2 User-programmable combination locks for securing cart front & rear doors
- Illustrated User Guide in English
- Power Cords for Australia

The Next Generation of Mobile Labs

Charge intelligently, store neatly, and move your mobile devices easily throughout your classrooms and building. Whether you're using MacBook or MacBook Pro laptops, we designed the Bretford Mobility Cart to better serve your learning environment.
