Rise to the occasion

Whether you're battling high flows, deep mud or big obstacles—or simply need the height and illumination to inspect pipe as large as 10' plus—count on the RX400's brute force to conquer the toughest jobs.

Illuminated rear-view camera

Selectable 512/640 Hz sonde

DigiSewer and laser compatibility

Sensors for tilt, roll, height, pressure and temp

4 aimable LED tri-lamps and 2 LED path lamps

Rangefinders to center camera, measure diameter

Expansion port for elevated rear-view camera

total integration

The RX400 works with all other ROVER X components, so upgrading your capability has never been easier and more affordable.

vertical range

With its remote-operated lift, the RX400 centers camera view in lines 24-59" diameter (or up to 79" diameter with optional extension accessory).

extreme capability

Powerful drive train and ground clearance are just the beginning—rear view camera, auxiliary lamps, laser rangefinders, sonde, sensors and expansion port are all built in.
