Industry Leading Performance

The **SC 357** and **SC 557** Combination Tools perform both spreading and cutting functions. The cutting force and blade opening of these tools are similar to modern cutters, and the spreading force is similar to a light-weight spreader. The tools are uniquely suited for first responders, structural collapse, disaster management and traffic accidents that demand both spreading and cutting. The tools also feature quick opening and closing times and optimum handling, achieved through a precisely balanced design.
