

CS0124 - 7 CHANNEL MIXER / AMPLIFIER WITH BLUETOOTH®

The AmpliVox CS0124 Mixer / Amplifier with Bluetooth® is designed to work with both low (4,8 or 16 ohms) and high (70 V or 100 V) impedance speaker systems.

A simple to operate and reliable 6-input solution with a built in Bluetooth media player for installation in small to medium size rooms in education, business and commercial applications.

The on-board plug-in play MP3 player accepts SD cards and USB thumb drives that can be plugged in on the front panel. The unit includes RCA inputs and RCA line level outputs, a telephone input with VOX priority and a MOH (Music on Hold) output, as well as an XLR input with phantom power. The IR remote for MP3, FM Radio and Bluetooth provides freedom and flexibility allowing full control, even from across the room.

This compact public address amplifier also supports playback from Bluetooth-enabled devices such as PCs, iPads, tablets or mobile phones, enabling anyone to walk-in and link up with their Bluetooth Wireless Connection to instantly play music or any sound source file.
