# MEDICINE CABINETS & MIRRORS GUIDE

## INSTALLATION TYPES

KOHLER® medicine cabinets come in two installation types: surface-mount and recessed. Our variety of dual-mount medicine cabinets can be installed either surface-mount or recessed.

### *Surface-Mount*

The cabinet or mirror mounts to your wall, no cutting required. Side kits are recommended for a polished look.

### *Recessed*

The cabinet installs between the studs in your wall. You'll need to cut into the wall to install and build the cabinet framework.

OR

### *Dual-Mount*

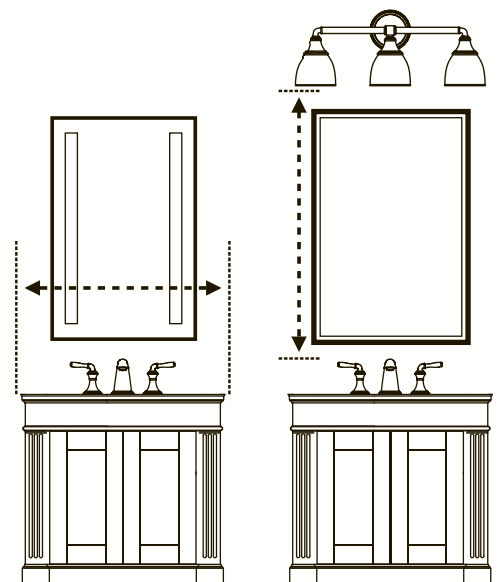

Note that some medicine cabinets can be installed either surface-mount or recessed.

## SIZES

To ensure the proper fit for your medicine cabinet or mirror, begin by measuring the width of your vanity. Typically your medicine cabinet or mirror should be narrower or the same width as the vanity.

To determine the height, measure the distance between your lights and faucet. Choose a size that provides clearance above the faucet and below the lights.

Integrated lighting can replace sconces to widen the mirror over the vanity.

Medicine Cabinet Mirror Size (Width)	Coordinating Vanity Sizes			
15"	20" single-basin	24" single-basin		
15" (two)	60" double-basin	72" double-basin
