

# Traffic Cone & Rail Systems

The TrafFix Cone is made of durable high density polyethylene plastic. The rugged TrafFix Cone has multiple uses in a wide variety of different applications. The cones are stackable for storage and transportation but won't "stick together" like vinyl cones. The TrafFix Cones have a hollow base that can be filled with sand or water or simply drop a sand bag on it in windy conditions.

CONE & RAIL SYSTEMS

## 43000 SERIES

The TrafFix Cone is 42" tall and comes with keyhole slots for mounting toggled TrafFix Rails. Reflective collars can be used for nighttime use.

The TrafFix Cone is great for mounting portable stop signs and lights or no parking signs.

The TrafFix Cone has a hole near the top and a ledge or shelf that makes it ideal for mounting small signs. The TrafFix Cone has many uses in construction areas, parades, county fairs, or wherever safety or crowd control is needed. The cone also makes a great stanchion or support for plastic fence and other flexible products.
