

# *TOILET SPACE*

We push flushing power, bowl cleanliness and toilet design to the leading edge. We never compromise. Why should you?

# *TOILETS*

## *Never Compromise on Performance*

Performance means reliable power without wasting water.

### *Better Flush. Cleaner Bowl.*

It's no secret that a better flush gives you a cleaner bowl, which is why we never compromise when it comes to flushing power or bowl cleanliness. Our "never compromise" attitude has resulted in our most perfect flush yet: Revolution 360® swirl flushing technology. Our Revolution 360 swirling flush sends 360 degrees of water through the bowl for complete coverage that leaves nothing behind.

### *Kick Your Plunger to the Curb.*

The driving force behind our powerful flushing is the AquaPiston® engine. AquaPiston is a canister flush valve that allows water to flow into the bowl from all sides, as opposed to the restricted entry of a traditional flapper, increasing the power and effectiveness of the flush. In short, AquaPiston packs a powerful punch to eliminate clogs without wasting water.

### *Wipe Out Dirt.*

The base of the toilet can be the hardest area to clean, so our clever designers created toilets with smooth bases. Eliminating the nooks and crannies of a traditional toilet gives dirt fewer places to hide, and it makes our toilets incredibly easy to wipe down and keep clean.

### *Saving Water Is for the Birds.*

And fish. And animals. And people. And the future. We work toward balancing the right amount of water with the perfect amount of power for a water-efficient flush that packs a serious punch.

#### **KOHLER.com/ToiletSatisfactionGuarantee**

We're confident in the performance of our toilets and smart seats, and we want to ensure that you and your customers are too.

# TOILET GUIDE

## TOILET TYPES

### *Intelligent*

Offering superior comfort and cleaning, intelligent toilets simply deliver a better experience, top to bottom. From heated seats and warm-water cleansing to automated flushing and more, our intelligent toilets help redefine one of life's most basic rituals.

#### **Leading-Edge Design**

Intelligent toilets feature an innovative tankless design that makes a stunning style statement.

#### **Dynamic Cleansing**

A warm-water wand, precision air dryer and a deodorizing filter provide personalized cleansing.

#### **Personalized Comfort**

Temperature, cleansing settings and more can be controlled with an intuitive touch-screen remote.

### *Wall-Hung*

Ideal for bathrooms with a limited footprint, wall-hung toilets feature a sleek, easy-to-clean design. With a hidden in-wall tank, only the bowl and flush plate are mounted to the wall, resulting in a streamlined profile that simplifies cleaning and saves up to 12" of space over standard floor-mount toilets.

### *One-Piece*

One-piece toilets are crafted from one single piece of ceramic, so the bowl and tank are integrated. This eliminates the seam between the bowl and tank, which means the toilet is easier to keep clean. Available with a concealed or skirted trapway, each one-piece toilet comes with the seat included.

### *Two-Piece*

This is the most common type of toilet, and it offers great value. A separate tank and bowl are assembled together. Bowls are also available with concealed or skirted trapways and seats are sold separately.

## TOILET LENGTHS

### *Elongated Bowl*

- Fits most residential spaces
- Provides added room and comfort for seating

### *Compact Elongated Bowl*

- Fits the elongated bowl into a round-front toilet footprint
- Saves up to 10 percent more space than an elongated bowl
- Offers added room and comfort for seating compared to a round-front toilet

### *Round-Front Bowl*

- Requires less space
- A good solution for small spaces

## SEAT HEIGHTS

### *Standard Height*

- Traditional-height toilets are ideal for small statures
- Low-profile models are perfect for small spaces

### *Comfort Height®*

- Sit at chair height—approximately two inches higher than standard-height toilets
- Makes standing and sitting easier
- Many are ADA-compliant when installed per applicable guidelines

### *Custom Height*

- Wall-hung toilets can be positioned at a custom height from 15¾" to 28½" to accommodate a range of statures
- Raised bowl allows cleaning underneath

# TOILET GUIDE

## TRAPWAY STYLES

### *Skirted Trapway*

Offers an easy-to-clean smooth surface from front to back.

#### **ReadyLock™**

We make it easy to enjoy the clean design of a skirted toilet. Our innovative, patented installation system doesn't require drilling, caulk or special tools, and it offers a secure installation.

### *Concealed Trapway*

Features a smooth trapway surface that's easy to wipe clean.

#### **Clean Caps®**

Clean Caps low-profile toilet floor bolts and caps make it easier to clean even the hardest to reach areas of the toilet. Offered on all concealed trapway toilets, or sold separately as individual kits.

### *Exposed Trapway*

Traditionally designed, exposed trapways can be seen from the side of the toilet.

#### **Bolt Caps**

Exposed trapway toilets are fitted with standard caps to cover the bolts that attach the toilet to the floor.

## FLUSH TYPES

### *Single-Flush*

- The AquaPiston® flush engine flushes over 2 pounds of bulk waste—4x more than is needed for the average adult—to eliminate clogs
- Most single-flush toilets save water by using only 1.28 gallons of water per flush
- Revolution 360® swirling flush keeps your bowl cleaner 2x longer than a conventional flush

### *Dual-Flush*

- Buttons or levers offer the choice between a half or full flush
- Saves water by using as little as 0.6 gallons of water for a light flush and up to 1.6 gallons for a full flush

## BOLD PERFORMANCE

### *Packed Into a Powerful 1.0-Gallon Flush*

The new, ultrahigh-efficient Highline® toilet combines style and function with a water-conserving 1.0-gallon flush in a clean design.

The 1.0-gallon flush exceeds MaP (Maximum Performance) requirements for removing solid waste in a single flush, and it reduces water use by more than 35 percent over 1.6-gallon toilets. That means water savings of approximately 4,500 gallons of water per toilet, per year.\*

\*Based on average household of four, each flushing 5.1 times daily, 365 day a year.

## COLORS

KOHLER® toilets are available in an array of colors. See availability online.

## OTHER CONSIDERATIONS

### *Rough-In*

Most bathrooms have a standard 12" rough-in (the measurement between the wall and outlet pipe). We also offer 10" and 14" options.

### *WaterSense®-Labeled Toilets*

WaterSense toilets meet strict EPA flushing guidelines, including using at least 20 percent less water than 1.6-gallon toilets. Look for the WaterSense label as you shop.

### *Shop by Style*

Our product sections throughout the book are organized by style—each section beginning with traditional and ending with modern designs.

# INTELLIGENT TOILETS

Once you experience an intelligent toilet, you'll wonder how you ever lived without one. A warm seat relaxes you, a soft spray cleanses you, a gentle breeze dries you. And you feel a cleaner kind of clean. It's a must-have for the modern spa bathroom experience. Every KOHLER® intelligent toilet includes:

- Motion-activated, hands-free opening and closing of cover and an automatic flush
- Advanced cleansing functionality with self-cleaning wand, precision air dryer and deodorizing filter
- Touch-screen remote control with wall-mount docking station
- Warm-air drying system with adjustable temperature settings and heated seat
- One-piece tankless design
- LED lighting to illuminate the bowl and conveniently serve as a nightlight

## Numi® Comfort Height®

### ONE-PIECE ELONGATED DUAL-FLUSH INTELLIGENT TOILET

# BETTER FLUSH. CLEANER BOWL.

## *Revolution 360®*

Revolution 360 swirl flushing technology sends water around the entire bowl for complete coverage that leaves nothing behind.

## *CleanCoat™*

CleanCoat technology prevents nasty things like bacteria, mildew and mineral deposits from sticking, so your toilet stays clean longer.

## *ContinuousClean*

ContinuousClean technology automatically fights grime, germs and stains with every flush to keep your bowl clean longer.

## *A Better Flush Gives You a Clean Bowl*

Combined, these technologies give you our cleanest flush yet.

With ContinuousClean | K-5709

### **Set up ContinueClean in three simple steps**

On select toilets, ContinuousClean technology is factory-installed and built into the tank. Setup is quick—just follow the three steps below. And once you set it up, you don't have to worry about it again until the light indicates you need new cleaning tablets. ContinuousClean gives you a truly self-cleaning toilet because there are no buttons to push. It simply cleans automatically and consistently with every flush.

### ***Step 1: Insert two toilet bowl cleaning tablets***

All you need are two puck-style toilet cleaning tablets of your choice. Once you access the inside of the tank, open the blue reservoir and place the two cleaning tablets inside. Two cleaning tablets cost approximately \$6, are widely available in retail stores and online and have a lifespan of approximately one year.

### ***Step 2: Set the dial***

Three settings let you decide how much cleaning power goes into each flush:

- ☞ is the recommended dose of cleaning agent
- is less cleaning agent
- + is more cleaning agent

### ***Step 3: Look for the blue light***

ContinuousClean comes with two AAA batteries, so there are no cords to worry about. The batteries power the LED indicator light that lets you know the system is working. After inserting the batteries and the tablets, look for a blue pulse (one-second in duration) that indicates the system is working properly and cleaning solution is being delivered.

# TWO-PIECE TOILETS

Two-piece toilets feature the traditional design of a separate tank and bowl. Two- and three-bolt installation systems provide a sturdy, level connection between the tank and bowl, making installation easy. Toilet seats are sold separately.
