STYLE 1577 SABERMASTER™ 1250

Applications:

The SaberMaster 1250 nozzle (style 1577) is the only electric remote controlled multi-purpose master stream nozzle in the fire service today. It finally makes remote controlled monitors truly remote; because you can now easily change from solid bore to fog flow streams with the flip of a switch. No other master stream nozzle has this two-in-one capability.

Benefits:

- The SaberMaster 1250 nozzle's remote control capability reduces the risk of injury by not having to climb onto the deck to change tips.
- The SaberMaster nozzle was developed so you can have both smooth bore reach and penetration and fog stream cooling and protection without having to shut down the flow to switch tips.
- With the SaberMaster 1250 there are no issues with tip storage or missing tips because changing from a solid bore to adjustable fog pattern is now done remotely.

Features:

- 2" Solid Bore Tip
- 1250 gpm (4800 lpm) @ 80 psi (5.5 bar) Fog
- 2 ½" or 3 ½" NH Swivel Inlet
- 12 or 24 volt
- Durable, Lightweight Pyrolite Construction
- Designed for use with Style 3440 DeckMaster or Style 3578 StreamMaster Monitors
