

Barrier-Free Units

ADA-compliant eye/face wash and shower equipment complies with requirements for wheelchair access.

- Eye/face wash units and safety stations include WideArea™ 4-way spray heads for maximum facial coverage.
- Showers and safety stations include extra long stainless steel pull rod for increased accessibility.
- ANSI-compliant sign included.
- Valve and spray head assemblies are fully water tested prior to shipment.

Barrier-Free

Recessed Laboratory Units

Emergency eye/face wash and shower safety stations save space by recessing into wall behind stainless steel drain pan.

- Pulling 'panic bar' handle opens drain pan to horizontal position to expose and activate eye/face wash spray heads.
- Drain pan collects waste water during use and returns into cabinet for drainage.
- GBF2152 offers cost effective installation with drainage out the front of the unit.
- Shower activates by pulling 'panic bar' handle located next to eye/face wash drain pan.
- Fits into standard 3-5/8" deep walls.
- ANSI-compliant sign included.
- Units are assembled and water tested prior to shipment.
