DRAINAGE SYSTEMS FOR **INDUSTRIAL APPLICATIONS** ALL OVER THE WORLD

BLUCHER® drainage systems have proven their functionality and reliability in the industrial sector all over the world. Food factories, the beverage industry, pharmaceutical and chemical plants are some of the places where you will find a vast number of drainage solutions from BLÜCHER.

SPECIALISED IN STAINLESS STEEL

INDUSTRIAL

Hygienic

Clean and hygienic conditions in production facilities, kitchen areas and changing rooms are important elements contributing to efficiency. Properly treated stainless steel has a unique smooth surface that guarantees maximum flow capacity and excellent hygiene. Due to its low surface roughness bacterial growth on stainless steel is significantly less than on, for example, plastics.

Withstands high temperatures

Stainless steel can withstand a high degree of vibrations and it functions within a wide scale of temperatures. Being able to withstand temperatures over 800 °C, stainless steel can fulfill any demand for hot-water cleaning. In addition, it is a highly fire-resistant material that requires no further fire protection.

Strong and light-weight

Stainless steel is a strong, durable, pressure and chemical-resistant material. Due to the excellent material properties the weight of our products can be reduced by more than 20% as compared to cast iron making installation fast and easy.

Easy maintenance

Shaped without rough corners or edges, cleaning and maintaining stainless steel takes minimum effort and time. The removable water trap provides easy rodding access.

Design

If design is a parameter, which is becoming the case in more and more aspects of life, stainless steel is a durable and classic material that also stands the visual test of time.

Environmentally safe

Stainless steel is 100% recyclable and non-toxic.

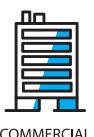

Fits everyone

The BLÜCHER® EuroPipe drainage pipework system can be used above and below ground, and it offers long-lasting and cost-efficient solutions for **all applications**.

Housing

Within the housing area BLÜCHER® EuroPipe is suitable for new building and renovation projects. BLÜCHER® EuroPipe provides the right flow in **single-family houses** and from the top floor to the basement in multi-storey housing.

Commercial

The light-weight push-fit system combined with the exceptional fire resistant solution make BLÜCHER® EuroPipe the preferred pipe system in projects around the world. **Hospitals, schools, airports** and other **commercial customers** are among our loyal clients.

Industrial

The **food, beverage** and **pharmaceutical industries** value in particular the hygienic and sustainable BLÜCHER® EuroPipe solution. The smooth stainless steel surface and high flow capacity prevent deposits inside the pipework system, and the stainless steel provides a solution, which requires a minimum of maintenance and offers maximum longevity. In AISI 316L steel the pipe system also provides a durable solution for the chemical industry.

Marine

The BLÜCHER® EuroPipe drainage pipework system is completely interchangeable between vacuum and gravity systems for black- and grey-water in marine applications. **Shipyards** and **owners** all over the world depend on longevity, low weight and the fire-resistant, hygienic and reliable solution for their sanitary discharge system.

KEEPING UP THE FLOW

BLÜCHER is committed to leading water away and keeping up the flow in the housing, commercial, industrial and marine sectors. The industrial sector depends on the performance of our solutions every day, where hygiene and durability are of great essence. Developing and producing drains, channels and pipes are BLÜCHER's core competence. We give you a wide and deep range of products to solve any drainage requirement within industrial applications.

Johnson & Johnson

Unilever

INDUSTRIAL

BIOTECH AND PHARMA

BLÜCHER provides safe drainage solutions removing water from production areas, laboratories, utility rooms, kitchens and changing rooms in the biotech and pharmaceutical industry.

Most suitable products

We offer a wide range of floor drains, channels and pipes as standard or customised products. Every care has been taken to develop products requiring minimum maintenance whilst offering excellent hygienic properties and high flow capacities, for instance the removable water trap providing easy access for cleaning and inspection.

Specifically suitable for the biotech and pharma industry are clean room floor drains with gas-tight cover, flushing-rim drains, dual-contained drains, pipes and channels.

The outlet of the drains of course connect directly to the **BLÜCHER® EuroPipe** drainage pipework system. With its excellent product quality BLÜCHER® EuroPipe fulfills the requirements of the biotech and pharmaceutical industry regarding, for instance, temperatures and resistance to chemicals. If required BLÜCHER® EuroPipe can be supplied as dual-contained for extra hygiene and safety or as pre-fabricated solution. The reliable push-fit system can be used for process waste and rainwater, soil and waste, and the system is used extensively for laboratory waste.

INDUSTRIAL

FOOD

BLÜCHER provides drainage solutions to all kinds of food factories. The smooth, easy-to-clean surfaces of the stainless steel products ensure excellent hygiene, self-cleansing and excellent flow capacity.

Most suitable products

We offer a wide range of drains, channels and pipes to solve any drainage requirement in the food industry.

BLÜCHER® Drain for all kinds of flooring with removable water trap, filter basket or sand bucket for easy cleaning.

BLÜCHER® Channel is available with or without outlet box, for grating or as slot channel. The channels are combinable with the same lower parts as the drains and are available with a wide range of gratings suitable for medium to heavy weight loads.

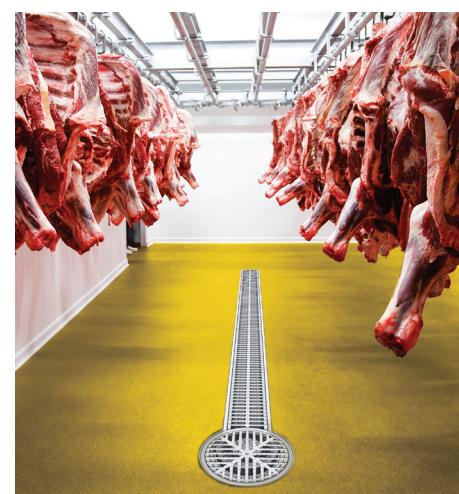

BLÜCHER® EuroPipe is an easy to install push-fit drainage pipework system that exceeds the demands of the strictest user and statutory requirements. The smooth inner surface prevents bacterial growth and blockages.

BLÜCHER® HygienicPro. Our high-capacity point and linear drainage systems provide efficient flow and prohibit bacterial growth while limiting water volume and production downtime.

Breweries and Dairies

INDUSTRIAL

BREWERIES AND DAIRIES

BLÜCHER provides drainage solutions removing water in brewery bottling halls, dairies and abattoirs - or from roofs - all over the world.

Most suitable products

The BLÜCHER® Channel and BLÜCHER® Drain

Industrial range of products are modular systems and therefore easy to plan. The frames and gratings are able to withstand the weight loading of heavy vehicles and goods being moved around.

BLÜCHER also offers an extensive range of accessories such as glass separator, filter basket and sand bucket, making it possible to completely avoid overloading the sewage system with unintentional discharges.

For roofs with bitumen or single-ply membrane BLÜCHER offers a complete roof drainage system for gravity or siphonic drainage.

"When planning the drainage systems, it was a vital point that we were able to design them with great accuracy in Denmark. The system provides a large impounding capacity and is capable of discharging very large quantities in a short time. Furthermore the system is practically self-cleansing, and this means that the brewery does not have to spend resources on day-to-day maintenance."

*Project manager Chris Lockhart,
Carlsberg brewery VENA, Sct. Petersburg*

INDUSTRIAL

BLÜCHER® DRAIN ROOF

BLÜCHER® Drain Roof encompasses stainless steel roof drains and accessories. In combination with the BLÜCHER® EuroPipe stainless steel push-fit pipework system, BLÜCHER® Drain Roof makes up a complete stainless steel roof drainage system. The system can be used for all types of flat roofs with bitumen or single-ply roof membrane, and is equally suitable for gravity and vacuum or siphonic systems.

Gravity Roof. Stainless steel drains with a bigger opening ensure safe flow and a long service life on the roof. The large inside pipe diameter combined with the smooth stainless steel surface gives 30% higher flow capacity.

Selected references

Westpack, IKEA. Complete reference list available on request.

Green Roof. With Green Roof you can control the maximum flow. Green roofs protect the roof covering from drying out due to UV rays. They allow water to evaporate and are environmentally friendly.

Blue Roof. Blue Roof retains the water on the roof and only releases it when the sewer can accommodate it.

Siphonic Roof. Siphonic Roof is a vacuum drainage system which can remove more than 110 m³ of water per hour. Only a few downpipes are required. Small-diameter pipes mean no air in the pipes as the water is drawn out by suction. Horizontal pipes without fall are fitted just under the ceiling.

Intelligent Roof. The intelligent roof notifies you when the drain is blocked by leaves or covered with snow. The intelligent roof detects potential damage before it occurs.

BLÜCHER offers you a complete roof drainage system.
