

PURE 2 GENERATOR

Our Pure2 series of generators takes the traditional 2-chem generation method to a new level. Utilizing 25% hydrochloric acid and 31% sodium chlorite, PureLine's Pure2 generators are able to realize conversion rates that far exceed competing lines that are only capable of converting lower concentration pre-cursors. This is one of our most affordable generators available in an open frame configuration or a fully enclosed cabinet.

With few moving parts, the Pure2 features low maintenance cost and reliable operation. The system has multiple safety interlocks and controls that allow the user to accurately maintain chem. feed ratios for optimal efficiency. The system is available with a batch tank and smart pumps that accept external control signals for flow pacing or residual control. With a relatively small footprint, the Pure2 is ideal for affordable and safe ClO₂ generation from <1 lb/day to > 1,500 lbs/day.
