

The answer to floor and drain sanitation challenges

PureLine's pHlor-San™ is the most comprehensive floor and drain sanitation service on the market.

The pHlor-San™ service is a process in which the entire treatment area floor is saturated with our Pure3000 liquid chlorine dioxide. The pHlor-San treatment is designed to address all of the stubborn floor and drain decontamination challenges.

- Kill all of the stubborn bacteria living in the biofilm on the floors and in the drains.
- Perfect for routine or emergency sanitation.
- Inexpensive, safe, and can be scaled to any size application.

PureLine™

Experts in the generation and application of chlorine dioxide.

i pHlor-San

PureLine's pHlor-San services is the most effective and comprehensive floor and drain sanitation service on the market, utilizing PureLine's EPA registered Pure3000 liquid chlorine dioxide. The pHlor-San service is the most comprehensive floor and drain sanitation treatment, offering customers piece of mind of a CLEAN BREAK.

+ Validation / Quality Monitoring

VALIDATION (Three-pronged approach)

- Pre/Post ATP swabs are taken to determine bioload reduction.
- Pre/Post swabbing is done to identify the CFU aerobic plate count reduction.
- All validation tests are sent to a third party lab for independent verification of a successful treatment and corrective action. The results will be included in the customer's post-treatment report.

QUALITY MONITORING

Real-time concentration monitoring is done throughout the treatment area to ensure equal gas distribution and target concentrations are achieved.

ClO₂ About Chlorine Dioxide (ClO₂)

Chlorine dioxide works by penetrating the cell wall of microorganism and disrupting the pathogen's metabolic functions, thus immediately and permanently eliminating the problem at its source.

PureLine's chlorine dioxide products and services are all EPA registered. Chlorine dioxide is also an approved sanitizer by the FDA and USDA.

Get a free, personalized sanitation consultation.

PureLine offers a complete line of chlorine dioxide products, solutions and accessories.
