

Need a clean break?

Large scale environmental sanitation made easy

MobileClean treatments are unparalleled in effectiveness and cost efficiency.

Whether its post-construction sanitation, concerns about a widespread bacterial outbreak, updating hygienic design of your facility, or simply want a clean break, MobileClean service offers the most effective and cost efficient solution.

- MobileClean has the power to treat facilities in excess of one million square feet.
- Entire treatments are typically done in less than 8 hours.
- Safe, non-corrosive, and can be scaled to any size application.

PureLine™

Experts in the generation and application of chlorine dioxide.

Advantages

- Guaranteed 6-log kill
- No capital investment
- Kills all bacteria, mold, viruses and other organisms
- No post-treatment clean up
- Non-corrosive at generated levels

Targeted Applications

- Provides a clean break
- Post-construction sanitation
- Widespread bacterial outbreak

Common Organisms

- Listeria
- E. coli
- Salmonella
- Clostridium
- Brucella
- Campylobacter
- Viruses
- Protozoa
- Mold
- Yeast
- Many other organisms

Validation / Quality Monitoring

VALIDATION (Three-pronged approach)

- Pre/Post ATP swabs are taken to determine bioload reduction.
- 6-log biological indicators are used to confirm PureLine's guaranteed 6-log kill.
- Pre/Post swabbing is done to identify the CFU aerobic plate count reduction.
- All validation tests are sent to a third party lab for independent verification of a successful treatment and corrective action. The results will be included in the customer's post-treatment report.

QUALITY MONITORING

Real-time concentration monitoring is done throughout the treatment area to ensure equal gas distribution and target concentrations are achieved.

About Chlorine Dioxide (ClO₂)

Chlorine dioxide works by penetrating the cell wall of microorganism and disrupting the pathogen's metabolic functions, thus immediately and permanently eliminating the problem at its source.

PureLine's chlorine dioxide products and services are all EPA registered. Chlorine dioxide is also an approved sanitizer by the FDA and USDA.

PureLine offers a complete line of chlorine dioxide products, solutions and accessories.
