

RAM1000LP

RAM1000LP LOW PROFILE AIR MOVER

Restoration Equipment

Abatement Technologies® Low Profile Air Movers are used for drying carpets, floors, walls, ceilings and furnishings after cleaning or flood restoration. The high airflow helps increase the rate of water evaporation, thereby drying wet surfaces within a much faster time. This unit features 2 safety devices, a resettable circuit breaker and an on-board duplex GFCI receptacle. CSA tested, this Air Mover conforms to UL 507 and CSA 22.2 No. 113 standards.

FEATURES & BENEFITS

- 2 speed settings. High (1000 cfm) and Low (700 cfm)
- Hour meter
- Can be placed in 4 drying positions
- Onboard GFCI protects against electrical shock in damp or wet applications
- Designed to stack for easy storage
- Easy to clean, removable front grill and polyethylene housing

TECHNICAL SPECIFICATIONS

DESCRIPTION	UNIT	RAM1000LP
Net Weight	lbs. (kg)	20.3 (9.2)
Dimensions (L x W x H)	in. (cm)	21.5 x 15.7 x 8.7 (545 x 400 x 220)
Power Supply Requirements	V, Hz, A	120 VAC, 60 Hz, 10 A
Normal Operating Amps	A	1.95 @ 120 VAC, 60 Hz on high speed
	A	1.65 @ 120 VAC, 60 Hz on low speed
Motor	-	High efficiency 1/3 HP motor
Air Flow	-	High speed, 1000 cfm = 2165 fpm at outlet
	-	Low speed, 700 cfm = 1607 fpm
Sound Level @ 5 Feet	dBA	67.6 on high speed, 56.6 on low speed
Cabinet Material	-	High density polyethylene
Stack Ability	-	Stackable
Power Cord	ft. (m)	18.8 (5.75)

Specifications and details are subject to change without prior notice.

Note: Airflow ratings estimates are based on factory and independent testing @ 120 VAC with an air straightener and a traverse of readings taken with a computing vane-anemometer. Actual results may vary for various reasons, including motor and blower and HEPA filter tolerances. Factors such as filter loading, reduced voltage to the motor, and inlet and outlet ducting will reduce airflow. Use these ratings as a general guideline only.
