Dedicated Outdoor Air Systems for high percentage and 100% outside air

Models RV and RVE

- Institutional Commercial Industrial
- Up to 18,000 cfm
- 3 in. wg External Static Pressure
- Packaged DX (5-70 tons), Chilled Water,
 Split DX Cooling with or without Remote Condenser,
 Air-Source Heat Pump (5-30 tons)
- Indirect Gas, Hot Water, Electric Heating, Air-Source Heat Pump
- Optional Energy Recovery
- Optional Return Air

Greenheck is 100% Dedicated to Outdoor Air Systems!

Models RV and RVE

- 2-inch double-wall with R13 foam insulation construction
- 800 to 18,000 cfm and up to 3 in. wg
- Ideal for 100% outdoor air, variable air volume, and single zone applications
- Direct drive, VFD driven, plenum supply/ exhaust fans
- Optional recirculation damper for 20-100% outside air and night setback operation
- · Optional total energy wheel
- Optional horizontal duct configurations for side return and supply

Cooling

- Chilled water, packaged direct expansion (5-70 tons), split direct expansion (with or without remote condenser), or air-source heat pump (5-30 tons)
- · Low sound condenser fans
- Optional inverter, digital or standard scroll compressor
- · Optional modulating hot gas reheat for humidity control
- Optional electronically commutated (EC) motor on lead condenser fan

Heating

- · Indirect gas-fired, electric, hot water, or air-source heat pump
- Up to 1,200 mbh heating capacity
- Optional 16:1 high turndown furnace

Remote Condenser

(Paired with Models RV-25, 45 and RVE-40, 85)

- 5 to 30 tons cooling capacity
- 800 to 8,500 cfm
- Hot gas reheat and compressors internally mounted and piped within the RV/RVE unit
- · Low sound condenser fans
- Lead EC condenser fan

Product Certifications

Greenheck takes pride in offering a high quality, reliable product. We invest our resources into designing, testing and manufacturing products to ensure customer satisfaction.

ETL Listed for electrical and overall unit safety. Every unit is tested at the factory before it is shipped to the jobsite.

AHRI Certified coils and energy wheels. To guarantee your coil is going to perform as required, check for AHRI Certification.

Energy recovery wheels are certified by the AHRI Air-to-Air Energy Recovery Ventilation Equipment Certification Program in accordance with AHRI Standard 1060. Actual performance in packaged equipment may vary. Certified ratings are available in the Certified Product Directory at www.ahridirectory.org.

Energy Efficiency

Inverter Compressor

An inverter compressor option is available from 5 to 70 tons. The inverter compressor provides many benefits.

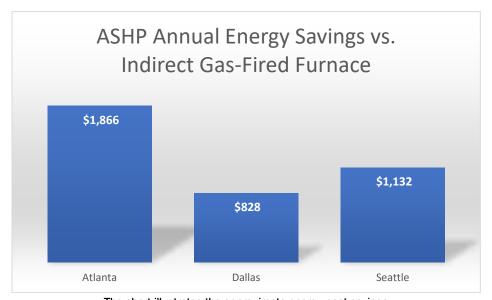

- · Improved part load efficiency
- Integrated Energy Efficiency Ratio (IEER) up to 22.1, with an average improvement over a digital scroll compressor of 15 to 20%
- · Reduced sound levels
- Precise temperature and humidity control

Air-Source Heat Pump (ASHP)

An air-source heat pump is available from 5-30 tons. This heating and cooling option offers:

- High efficiency with an inverter compressor (standard feature)
- Lead EC outdoor fan motor (standard feature) for modulating head pressure control
- Coefficients of Performance (COP) ranging from 3-4, contributing to lower annual energy costs

The chart illustrates the approximate energy cost savings of an ASHP over an indirect gas-fired furnace.

High Turndown Furnace

A high turndown furnace option is available on models RV and RVE. This high turndown is industry-leading technology for the tubular-style heat exchanger market.

- Up to 16:1 turndown per furnace
- Precise temperature control
- Fully modulating control
- · Less cycling during part-load conditions
- · Commissioning sequence for easy start-up

Simple, Easy Start-Up

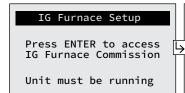

Microprocessor

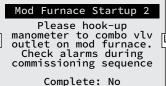

Models RV and RVE include a microprocessor controller that is factory programmed, wired and tested prior to shipment. The controller can operate stand-alone or integrate with a Building Management System (BMS) using BACnet® MS/TP or IP, LonWorks® or Modbus® RTU protocols. This controller is responsible for operating the unit in a safe and energy efficient manner while controlling temperature and humidity.

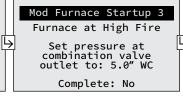

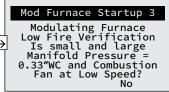

Built-in Furnace Commissioning Guide

Controller commissioning menus make for simple and easy start-up, saving time and money. See below for example of furnace start-up menus.

Web User Interface (UI)

Greenheck's microprocessor controller comes standard with a web user interface allowing the unit to be viewed and controlled from a web browser. With an Ethernet connection from the RV or RVE unit to the facilities network, a full graphic, specific to the unit selected, will allow for monitoring and control of the unit without a Building Management System (BMS). Other features include full control display access, customizable data trending, and service contact information.

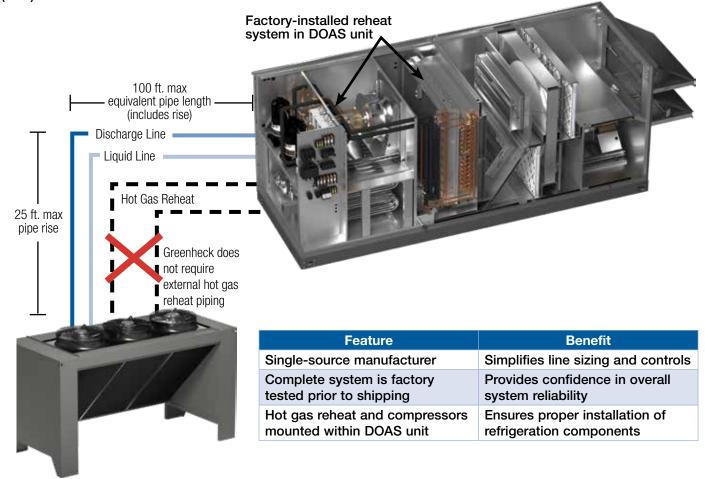

Application Flexibility

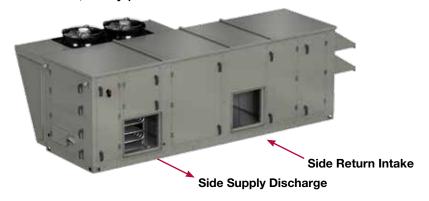

Remote Condenser

Greenheck's optional remote condenser features factory piping and wiring of the hot gas reheat components, providing quicker installation with indoor or outdoor mounting options. Available from 5 to 30 tons. Common applications include standing seam (sloped) roofs, retrofits, restricted roof space, and restricted structural (load) limitations.

Horizontal Duct Connections

An optional side or end return air intake and side discharge is available for installation flexibility. Common applications include indoor mounted, pad mounted, or rooftop mounted reducing ductwork, system effect, and eliminating the need for a tall, costly plenum curb.

Standard and **Optional Features**

Plenum Supply/Exhaust Fan

- Direct drive plenum fan
- Neoprene isolation
- · Factory provided variable frequency drive

Total Energy Wheel (RVE)

- · Sensible and latent energy recovery
- · Lightweight, segmented wheel for easy cleaning
- L₁₀ rated bearing life in excess of 400,000 hours
- · Permanently bonded, silica gel desiccant for latent transfer - long term durability
- · Stainless steel housing

2

Construction

- · 2-inch double-wall construction unit housing and base
- R13 foam insulation thermally broken
- · Available finishes include:
 - Permatector™ (2,500 hr/salt spray rating under ASTM B117 testing conditions)
 - Hi-Pro Polyester (5,000 hr/salt spray rating under ASTM B117 testing conditions)

Filters

- Outdoor air and exhaust filters (pre-wheel)
 - 2-inch MERV 8
 - 2-inch aluminum
- Supply filters (pre-coil)
 - 2-inch MERV 8 or MERV 13
 - 4-inch MERV 8 or MERV 14
 - Combination of MERV 8 and MERV 11, 13 or 14

Control Center

- 24 VAC control voltage
- Control transformer
- · Non-fused disconnect switch
- UL Listed, Recognized, or Classified electrical components
- Factory prewired for single point power connection
- Phase and brownout protection (PDX)
- · Optional exhaust fan only power

Cooling Options

- · Packaged direct expansion (PDX)
 - Optional modulating head pressure control (EC motor or VFD on lead condenser fan)
- Chilled water coil
- Split DX coil with or without remote condenser
- · All coils with copper tubes and permanently expanded aluminum fins
- Mounted on a stainless steel drain pan
- · Air source heat pump
 - Standard features include inverter compressor and modulating head pressure control

- Aluminum mesh filters
- Wind-driven rain prevention

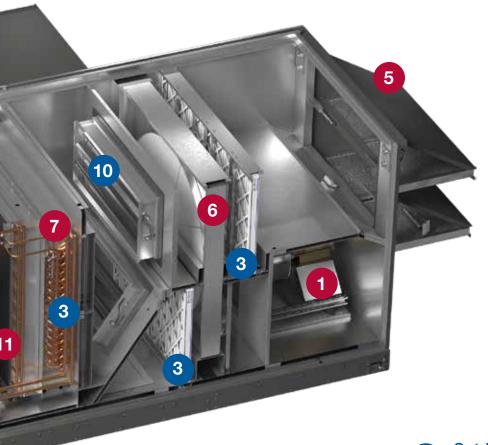

Standard and Optional Features

Compressors

- Quiet operating hermetic, scroll-type
- 5 to 70 tons of mechanical cooling
- · Optional compressor for lead circuit:
 - Standard scroll
 - Digital scroll
 - Inverter scroll

Standard Feature

Optional Feature

Optional Accessories

- Building Pressure Sensor
- CO₂ Sensor
- Condensate Overflow Switch
- Condenser Hail Guards
- Dirty Filter Sensor
- Duct Pressure Sensor
- Economizer Control
- Electrofin Coated Coils
- Energy Wheel Bypass Damper
- Microprocessor Remote Interface
- Outdoor/Exhaust Airflow Monitor
- Roof Curbs
- Room Temperature Sensor
- Combination Room Temperature and Humidity Sensor
- Room Thermostat
- Rotation Sensor
- Service Lights
- Service Receptacle
- Smoke Detectors
- Wheel Frost Controls

Outdoor Air and Recirculated Air Dampers

- Low leakage or insulated low leakage
- · Modulating actuator

Heating Options

- Indirect gas-fired furnace
 - Optional high turndown furnace (up to 16:1) - patent pending
 - Stainless steel heat exchanger with optional
 5 or 10 year extended warranty
- · Electric heater
 - Silicon controlled rectifier (SCR) control
- · Hot water coil
- Air-source heat pump

Reheat

- Modulating hot gas reheat
- 6 in. separation between DX and reheat coil components to prevent evaporation of condensate

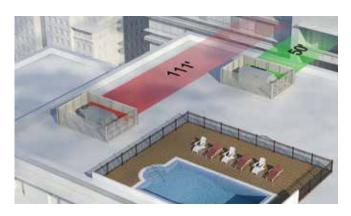

Quietly Making an Impact

Greenheck offers a variety of solutions for soundcritical applications allowing for unprecedented design flexibility.

- Low sound swept blade condenser fans
- 2-inch R13 foam unit and base
- Compressor isolation
- Tested radiated sound data

Greenheck's actual radiated sound data is tested in accordance with AMCA 320-07 in our state-of-the-art testing facility, the Robert C. Greenheck Innovation Center.

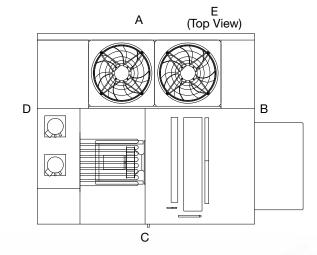

The low sound condenser fans paired with the radiated sound data of the unit operating at full load allows proper design with actual tested data. For example, if equipment is too loud or placed too closely to other buildings, corrective actions can be time consuming and costly. Greenheck provides low sound condenser fans as standard, offering an average sound power reduction of 5 to 8 decibels when compared to typical condenser fans.

RADIATED SOUND LEVELS											
Disease	Octave Bands (Lw)								Plane	Plane	
Plane	1	2	3	4	5	6	7	8	Lw	LwA	
Α	73	85	78	80	81	73	67	62	88	83	
В	71	79	69	78	73	68	64	57	83	78	
С	79	77	69	76	75	70	60	59	83	78	
D	74	77	72	74	74	67	61	58	82	77	
Е	77	84	78	79	77	72	65	61	87	81	
Total	83	89	82	85	84	78	71	67	93	87	

Tests conducted in accordance with AMCA 320-07 - Laboratory Methods of Sound Testing of Fans Using Sound Intensity.

Free field measurement plane created one foot from unit on all sides and top tested at max capacity.

Did you know?

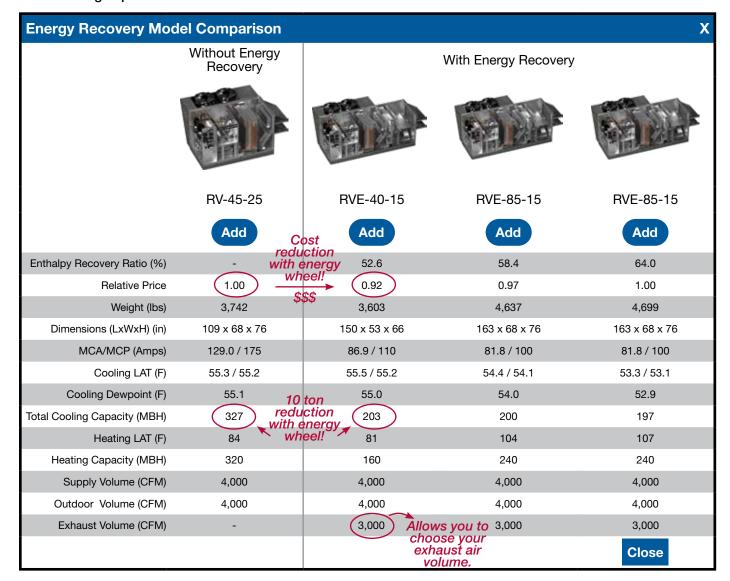

The blade shape of the low sound condenser fan was modeled from one of the best - nature! The barn owl is known for its quietness during flight to fly just above their prey, without being detected. That quietness is attributed to their specialized feathers featuring a serrated edge, very similar to the profile of the fan blades in our low sound condenser fans.

Web-Based Outdoor Air Selections

Greenheck's free, online eCAPS® Engineer Application Suite provides fast and easy selection of HVAC products including RV and RVE products. Go to ecaps.greenheck.com and see how this comprehensive specifying tool can save you time.

- Online and always up-to-date
- Fast and efficient selection
- Simplified Dedicated Outdoor Air System (DOAS) selection providing:
 - Weights Capacities
 Dimensional data Revit content
 Electrical data Unit cut sheets
- · Quick comparison of unit options with or without energy recovery
- Scheduling capabilities within minutes

Outdoor Air Solutions

Challenge: Conditioning High Percentage Outdoor Air with Minimal Energy Usage

- 2-inch double-wall R13 foam construction
- Energy recovery wheel to precondition the outdoor air (optional)
- Modulating hot gas reheat coil (optional)
- Inverter compressor (optional)
- High turndown indirect gas-fired furnace (optional)
- Modulating head pressure control (optional)
- Air Source Heat Pump (optional)

Challenge: Controlling Outdoor Air Volume

- · Low leakage dampers with modulating actuator
- Factory mounted and wired microprocessor controller
- Energy efficient control sequences
- Direct drive plenum fan with factory mounted VFD
- Remote monitor and control from web-user interface

Solution

- · Low sound condenser fans
- Radiated sound data off five planes of unit tested at full load
- 2-inch R-13 foam insulated unit base
- Compressor isolation
- Inverter scroll at part load (optional)
- Electronically commutated (EC) motor (optional)

Challenge: Finding a Manufacturer Dedicated to Outdoor Air

Solution

Models RV and RVE 5 to 70 tons 800 to 18,000 cfm

Our Commitment

As a result of our commitment to continuous improvement, Greenheck reserves the right to change specifications without notice.

Product warranties can be found online at Greenheck.com, either on the specific product page or in the literature section of the website at Greenheck.com/Resources/Library/Literature.
