

Commercial Aviation Fueling Products

Cla-Val is the leading manufacturer of aviation fueling products for commercial and military applications. From the valves that control rate-of-flow and fuel shut-off operations in the fuel farm to the couplers and nozzles that are used to refuel aircraft on the tarmac, Cla-Val has the products needed to achieve optimum fueling efficiency and the highest level of safety. Cla-Val offers a wide range of fueling solutions for commercial aviation applications including the following featured products.

**353GF Pressure
Regulating Coupler**

352GF Hydrant Pit Valve

**347GF Underwing
Fueling Nozzle**

**354GF In-Line Pressure
Control Valve**

**40-36 Rate-Of-Flow &
Fuel Shut-Off Valve**

**349GF Strainer
Ball Valve**

**Automatic Control Valve
with Integral Flow Meter**

**D-3 Swivel Inlet for
Fueling Nozzles**

**CFF21 Series Flanged
Float Control**

Cla-Val aviation and ground fueling products are designed and manufactured in accordance with applicable industry standards and our own rigorous in-house quality program.

**EI Specification 1584, Third Edition for hydrant pit valves • SAE AS5877
CE# 0036 for automatic control valves • AF-System Safety Engineering Analysis for refueling pantographs
ATEX for fueling nozzles and control valves**
