gamma/ XL Series

Automatic Degassing for Critical Applications!

The new **gamma/ XL** is a solenoid metering pump with predictive intelligence. Thanks to its controlled solenoid drive with sensor-free pressure measurement, it detects hydraulic faults even in the case of minimal deviations – immediately and optimally matching its output to the pressure conditions and properties of the medium while protecting the pump and piping systems from overload situations. The **gamma/ XL** covers a capacity range of **.08 GPD** at **362 PSIG** to **20.74 GPH** at **29 PSIG** (depending on pump version).

Positive suction is recommended on pumps with 1/2" MNPT connections.

gamma/ XL metering pumps with high viscosity liquid ends (PVT 4) have a 10 - 20 % lower capacity rating and are not self-priming.

Permissible ambient temperature: 14 °F to 113 °F | Average power consumption: 78 W | Degree of protection: IP 66

Repeatability \pm 2% when utilized and installed per operating instructions

* Capacity data represents minimum values, tested using water at 68 °F (room temperature)
