HACH UNIVERSAL DATA GATEWAY 1000

Data Collection and Visualization Simplified

Hach UDG1000™, the Hach Universal Data Gateway 1000, automatically collects process data from multiple sources and stores, aggregates and exports the data to easily meet your reporting and visualization needs.

Easy data access and visualization with UDG1000 Viewer

• Access your data easily anytime from anywhere, for troubleshooting, compliance and analysis.

• See your key values and trends on an efficient dashboard.

• Access your data conveniently with a PC or smart device.

### Automatic detection of data sources starts data collections without delay

• Quickly use data from Hach sc digital conrollers, PLCs, SCADA, process instrumentation, Open Database Connectivity (ODBC), etc. with UDG1000 easy set up

• Collect data in user-specified time intervals and filter according to your rules for easy data utilization.

• Store and retrieve error-free raw data so you can easily view it at any time.

### Leverage your investment in smart probes by utilizing all the data the probes provide

• Acquire, view and utilize data without SCADA.

• Use OPC DA server to easily integrate with SCADA.

• Have more confidence in your data with data about your data (meta data)

• Minimize wiring costs by consolidating 4-20mA to a central location.

### Buy what you need now, expand later

• Flexible, open and cost-effective. Grow the solution along with your needs. Buy only what you need now, add when you need to.

• Add functionalilty as needed with additional drivers

HACH ®

Be Right™

Modular architecture provides flexibility and cost savings.

View aggregated key parameters with Hach UDG1000 Viewer.

View raw data as it is collected.
