

Claros, the Water Intelligence System

Now with more power to integrate your Instrument Management and Data Management

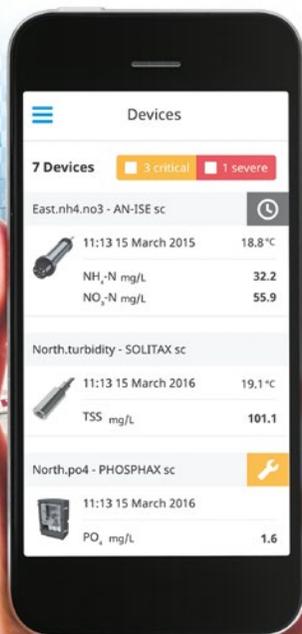

Claros™ gives you powerful operational insights – and now includes enhanced features that help you integrate your Instrument Management and Data Management:

- View and trend measurement values from Claros-Enabled sensors and manually collected lab and field data in spreadsheets and graphs.
- Integrate Instrument Management and Data Management products in one easy-to-navigate application.
- Instant notifications for upcoming/required maintenance, as well as guided workflows, ensure that measurements can be trusted.

SCADA users will appreciate the additional flexibility that Claros offers, putting the power of data in the palm of your hand. Claros gives you tools that are intuitive, customizable, and flexible – powerful tools that provide actionable insights, allowing you to use data to drive decisions.

With Claros, you can integrate all of your data sources, from process data, to device data, to lab and field data – helping you maximize efficiency across every aspect of your operation.

And with the growing suite of Claros-Enabled sensors, controllers, devices, Real-Time Control systems, and lab equipment from Hach®, you can configure a system that fits the unique requirements of your plant.
