DTEN Board D5

REAL-TIME COLLABORATION

Collaboration across workspaces and geo-distributed teams.

DTEN solutions allow users to collaborate across local workspaces, and geo-distributed teams.
The interactive whiteboard and stylus allow easy annotations on the DTEN Board.
Teams can now achieve communication efficiency like never before.

KEY FEATURES

Easy Setup

Plug in the power and
switch on the DTEN Board,
then it is ready to use.

Unlimited Canvas

Unlimited writing space.
Snap & Save -
Simply scan the QR code
from the DTEN Board to
save DTEN Notes.

Intuitive Controls

Write and erase like a
traditional whiteboard.
Easy annotation with
different pen colors
and background.

DTEN Apps

Use the DTEN app
(iOS & Android) to share
your mobile content or save
the DTEN Note PDF files.
Seamless experience to save,
transfer and share content.

DTEN Share

One press to share
your PC or Mac screen
on a DTEN Board.

Two-Way Control

Control your device
via the DTEN Board.

Dedicated Wi-Fi Network

Stable and secure
connection between
DTEN and your devices.

DTEN NOTE

Up and running in 3 seconds

We designed the most intuitive interactive solution for our users: use pen to write, user fingers to move or select, and magically use real eraser to erase. Focus on your ideas, not on how to use the machine.

Canvas with no border limit

Simply write on the available screen. Design workflows, brainstorm, create. Then move to a fresh, new section on the screen with two fingers.

Save as PDF

No need to take pictures after your discussion any more. DTEN Notes saves your work as a PDF so you can easily send it to others.

DTEN SHARE — MIRROR PC/MAC WITH ONE CLICK

Easy and secure

Maximize your meeting time by staying focused on your ideas instead of wasting time on setup. The one-click wireless technology lets you share quickly and easily without thefrustration of getting your equipment to work.

No Wi-Fi setup

With DTEN Share, get two-way control between your device and the DTEN Board. Simple one click to share your presentation on the screen and control what's on the screen from the DTEN interactive display. No need to walk back and forth from your laptop to the display screen.

Fast, secure, and dedicated Wi-Fi network

DTEN has built-in WiFi that provides a dedicated network. It has private bandwidth, with a fast and secure connection. You can access this with the DTEN Share dongle only.
