

Do limited resources stop you from developing your best TOC sampling system?

Combine the **organic detection power** of **BioTector** with the **sampling ease** of the **Venturi Sampler**.

Eliminate Errors

Get consistent, repeatable sample preparation with the Venturi Sampler and BioTector which are designed to work together.

Ditch the Pump

The Venturi's vacuum pulls directly to the BioTector, closing the gap between analyzer and sampler.

User Friendly

Ease of use and compatibility is part of both instrument designs. *The Venturi Sampler is compatible with the BioTector B7000 model.*

Call Hach to discuss the Venturi Sampler today at 800-227-4224.
