Tri-Dim Service Capabilities

KEEPING YOU AHEAD OF IAQ ISSUES

The need for HVAC hygiene has never been greater than today. As we transition out of the current pandemic, the need for preventive measures has become clear. Tri-Dim brings the knowledge and solutions to get your building back 'on-line' — and to keep it running while minimizing the risk.

Tri-Dim's Service division has over 20 years of experience in offering clean air solutions for your HVAC system and your facility. This document highlights just a few of the capabilities that Tri-Dim provides. Please contact your local sales representative to discuss the full range of services available.

DEEP CLEANING SERVICE

Tri-Dim's Deep Cleaning Services start with unit evaluations and include 'before and after' picture documentation of the work completed.

Available services include:

- Pre/final filter changes
- Belt replacement
- Greasing of bearings
- Coil cleaning with before/after pressure drop readings
- Condensate pan/drain-line inspections
- Pan protection tablets

Tri-Dim Services

Keep ahead of IAQ issues

QUARTERLY PREFILTER CHANGES AND FRESH AIR SECTION CLEANING

Tri-Dim offers turnkey filter management services, which are scheduled according to your individual requirements. These services include filters, installation, disposal, and a record of any potential maintenance issues.

Services are accompanied with documentation for your records and risk assessment purposes. Technical support and a review of product suitability are also provided.

CONDENSATE PAN REPAIR/ COATING/INSTALL NEW DRAIN LINES

Condensate pans are an essential part of your system and can create serious issues when not properly functioning.

Tri-Dim's Condensate Pan service gets your system back up and functioning properly—potentially avoiding costly condensate pan replacement.

MAGNEHELIC GAUGE INSTALLS

Changing air filters on a time schedule can be costly and lead to catastrophic failure if filters are left in too long. Magnehelic gauges display filter resistance to the air flow, which is a better indicator of when a filter change is required.

Tri-Dim Service can properly install and help maintain magnehelic gauges to help maximize your filter life and optimize your costs.

Tri-Dim Services Additional Offerings

DUCT CLEANING

Tri-Dim uses the latest technology and equipment to ensure your ducts are clean and fit for service. The before and after photos above are an example of both the effectiveness and documentation of work completion.

Tri-Dim Filter Corporation is committed to continual product development - all descriptions, specifications and performance data are subject to change without notice. Tri-Dim products are manufactured to exacting criteria - there can be a $\pm 5\%$ variance in filter performance.

HVAC REFURBISHMENT

Tri-Dim's Service division can also help with HVAC refurbishment and retrofits to bring an old system up to current standards. Service includes insulation replacement, filter rack conversion, mold abatement, fan and frame coating, and UV installation.
