

AK FLEX™

Temperature Limit: 850°F (454°C)

DESCRIPTION

AK Flex pipe and tank insulation is a 48" wide semi-rigid glass mineral wool blanket, 2.5 PCF density, in roll form. It is available faced with a factory-applied ASJ or FSK vapor retarder jacket. The fiber orientation provides excellent compressive strength while maintaining flexibility for ease of installation.

APPLICATION

Manson Insulation AK Flex pipe and tank insulation is typically used on tanks, vessels and large-diameter (greater than 10") pipes. It can be used for any curved or irregular surfaces that require finished characteristics of rigid glass mineral wool insulation.

FEATURES AND BENEFITS

Excellent Thermal Properties

- Low thermal conductivity ratings to 850°F (454°C)

Low-Cost Installation

- Flexible
- Easy to handle and Fabricate

Inventory Savings

- No need to stock multiple sizes
- Various thickness available to meet all your pipe and tank insulation needs.

Resists Damage

- Tough and durable
- Resists damage in shipment as well as during and after installation

SPECIFICATION COMPLIANCE

ASTM C612

- Standard specification for mineral fiber board insulation,
- Type IA (1.6, 2.25, 3.0, 6.0 PCF) (26, 36, 48, 96 kg/m³)
- Type IB (3.0, 6.0 PCF) (48, 96 kg/m³)

ASTM C1136 (facings):

- FSK: Type II
- ASJ: Type I, II

California Title 24

City of New York MEA 363-83-M

Puncture Resistance (TAPPI Test T803) (Beach Units)

- FSK facings: 25
- ASJ facings: 50

PRODUCT FEATURES

Greenguard Certification

- Over 50% post-consumer recycled glass

EUCEB

- This product is tested and certified to meet EUCEB requirements.

Water Vapor Transmission (ASTM E96, Procedure A)

- FSK & ASJ vapor retarders have maximum vapor transmission rate of 0.02 perms

Water Vapor Sorption (ASTM C 104)

- Less than 5% by weight when exposed to air at 120°F (49°C) and 95% humidity for 96 hours

Shrinkage (ASTM C356)

- Less than 0.3% linear shrinkage

Microbial Growth (ASTM C1338, G21, G22)

- Does not promote or support the growth of fungi or bacteria

CGSM 51-GP-10M

- Canadian specification for mineral fiber board insulation

Fire Hazard Classification

- UL 723, CAN/ULC-S102-M-88, ASTM E84, NFP90A & 90B
- Flame spread index not exceeding 25 and smoke developed index not exceeding 50

Corrosiveness (ASTM C665)

- Will not accelerate corrosion of aluminum, steel or copper

STRETCH-OUTS
ADDITIONAL 2" (51 mm) TO 4" (102 mm) SHOULD BE ADDED FOR LAP

NOMINAL IRON PIPE SIZE	IRON PIPE OUTSIDE DIAMETER	THICKNESS

INSTALLATION

For proper application of Manson Insulation AK Flex pipe and tank insulation simply follow these guidelines:

- Refer to the Stretch-out Chart to find the appropriate length to cut for the specific pipe size. Be sure to add an additional 2" (51 mm) to 4" (102 mm) for your staple flap.
- Cut your stretch-out length and wrap the material around the iron pipe to ensure the proper fit.

GLASS MINERAL WOOL AND MOLD

Glass mineral wool insulation will not sustain mold growth. However, mold can grow on almost any material when it becomes wet and contaminated. Carefully inspect any insulation that has been exposed to water. If it shows any sign of mold, it must be discarded. If the material is wet but shows no evidence of mold, it should be dried rapidly and thoroughly. If it shows signs of facing degradation from wetting, it should be replaced.

NOTES

The chemical and physical properties of Manson Insulation AK Flex pipe and tank insulation represent average values determined in accordance with accepted test methods. The data is subject to normal manufacturing and testing variations. The data is supplied as a technical service and is subject to change without notice. Reference to numerical flame spread ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions.

Check with your Manson Insulation Area Manager to assure information is current.
