LOW PRESSURE MIXED FLOW FANS

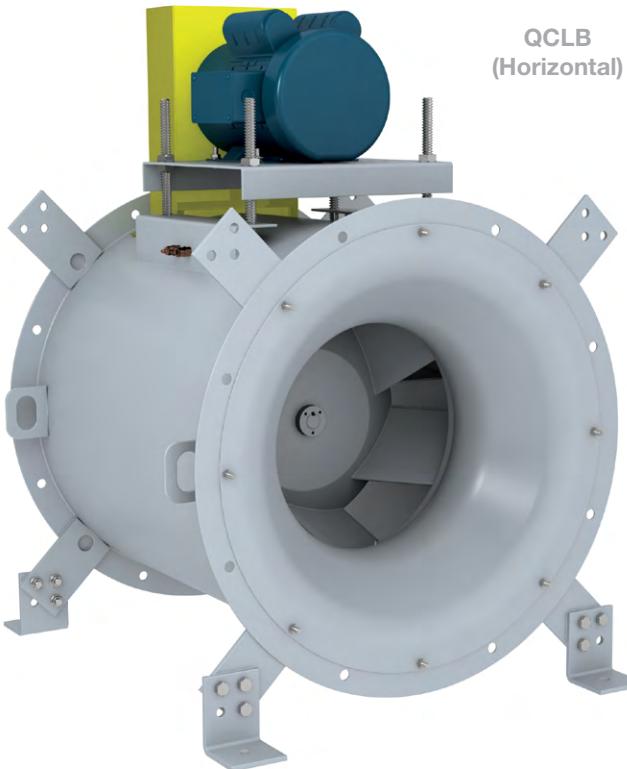

QCLB | QCLBR | QCLBSH

MIXED FLOW FANS

Models

QCLB | QCLBR | QCLBSH

**QCLB
(Horizontal)**

Benefits of Mixed Flow Fans

Twin City Fan Model QCLB Mixed Flow Fans combine the benefits of axial flow and centrifugal flow fans. The QCLB has the advantages of an axial fan in its compact design and straight-through airflow combined with a centrifugal fan's preferred acoustical characteristics and high pressure capabilities. Mixed flow fans offer the most economy of operation when compared with equivalently sized tubular centrifugal or axial fans with a higher and broader efficiency range.

Typical Applications Include

Data Center Exhaust, General HVAC, Generator Room Ventilation, Swimming Pool Exhaust, Kitchen Exhaust, Dishwasher Exhaust, Elevator Shaft Exhaust/Pressurization, Emergency Smoke Exhaust, Stairwell Pressurization

Configurations

Belt Driven - vertical & horizontal mount configurations

Wheel Types

Mixed Flow

Standard Construction

Level 1 & 2

Optional Construction

Spark Resistant, UL 705, UL 762, UL Smoke & Heat, Seismic

Certifications

AMCA Sound/Air and FEG, UL 705 Listed for Electrical, UL 762 Listed for Grease Laden Air, UL Listed for Smoke Control Systems, OSHPD Seismic - OSP-0195-10

Model QCLB is available with the UL/cUL 705 listing for electrical, File No. E158680.

Model QCLBR is UL/cUL 762 listed for the exhaust of grease-laden air as standard, File No. MH-25478.

Model QCLBSH is UL/cUL listed for Smoke Control Systems as standard, File No. MH-29313, 500°F for 4 hours and 1000°F for 15 minutes.

Twin City Fan & Blower certifies that the Model QCLB, QCLBR and QCLBSH Mixed Flow Fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program. See Catalog 1071 for sound ratings.

TWIN CITY FAN

For complete product performance, drawings and available accessories, download our Fan Selector program at tcf.com.

Models

QCLB | QCLBR | QCLBSH

General HVAC Fans

QCLB

12.25" to 73" wheel diameters
Airflow to 105,000 CFM
Static pressure to 4.5" w.g.

Kitchen & Restaurant Fans

QCLBR

12.25" to 73" wheel diameters
Airflow to 105,000 CFM
Static pressure to 4.5" w.g.

Smoke & Heat Applications

QCLBSH

12.25" to 73" wheel diameters
Airflow to 105,000 CFM
Static pressure to 4.5" w.g.

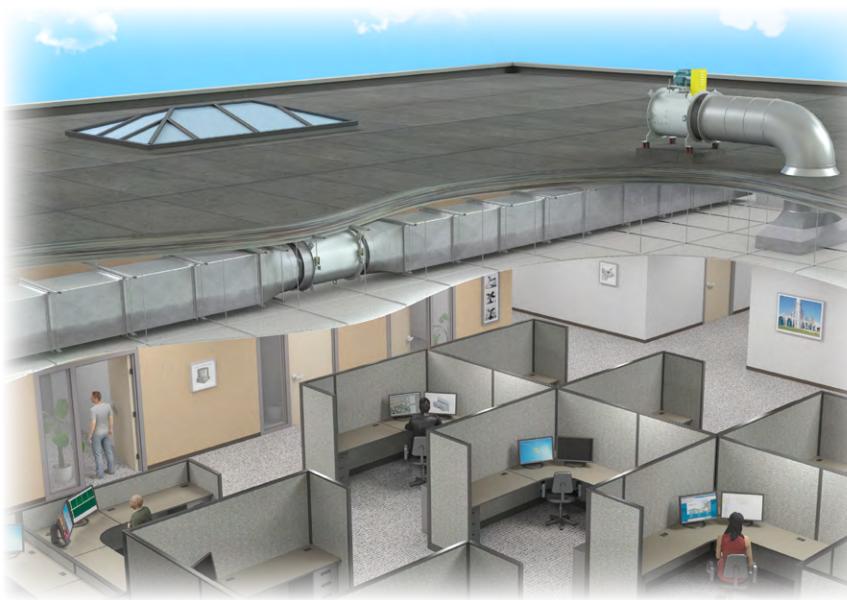

Temperature Rating

500°F for 4 Hours
1000°F for 15 Minutes

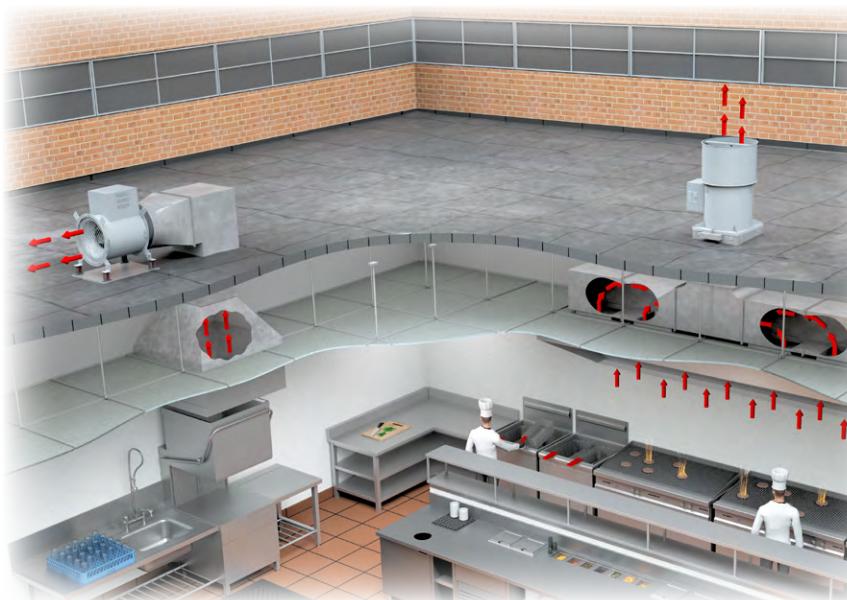

Wheel Design

Mixed flow wheels are designed with single surface, die-formed, continuously-welded blades for stable air performance throughout the operating range. The wheel is statically and dynamically balanced prior to assembly and rechecked for balance after assembly by Twin City Fan & Blower.

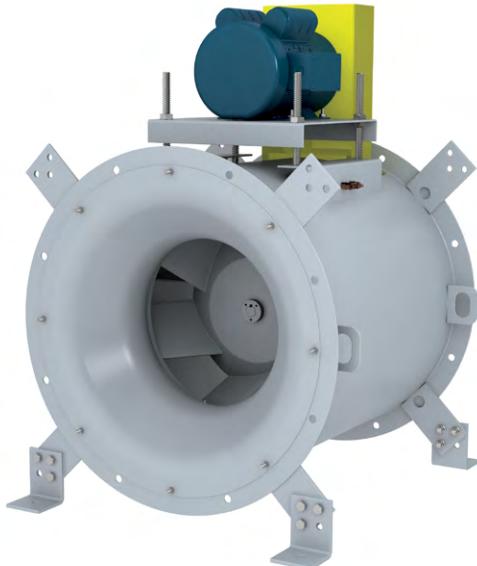

General HVAC Supply and Exhaust

Smoke & Heat (Emergency Smoke Control) and Restaurant Exhaust

MIXED FLOW FANS

QCLB Mixed Flow Fans

The QCLB Mixed Flow Fan is a popular choice for many air supply, return and exhaust air applications in the HVAC industry for both constant or variable air volume systems. The efficiency and sound characteristics of mixed flow fans are often desired in buildings such as hospitals, libraries, theaters, and general offices. The heavy-duty construction of QCLB fans also makes them suitable for many industrial applications handling ambient air.

Standard Product Features

- Belt guard, ventilated (weather cover for VRM)
- Discharge cap (for VRM)
- Continuously welded housing
- Inlet & outlet flanges
- Bolted access door

QCLBR Restaurant Fans

Twin City Fan & Blower offers a specially modified version of the QCLB fan designated as "QCLBR" (Mixed Flow Restaurant Exhaust) for exhausting grease-laden air from kitchens, restaurants, cooking and dishwasher hoods. QCLBR is available in sizes 90 through 600.

Model QCLBR is cULus 762 listed for exhaust of grease-laden air. QCLBR is licensed to bear the AMCA certified ratings seal for sound and air performance.

The QCLBR fan is available in all configurations with the exception of vertical down (VDO and VDI).

Standard Product Features

- Belt guard, totally enclosed, ventilated (weather cover for VRM)
- Belt tube, sealed
- Two cleanout doors located 180° apart (90° from motor) 2" drain located 180° from motor (lowest point for horizontal) vertical at the funnel
- Cooling fins on wheel
- Housing sealed with Hi-Temp caulk
- Two (2) bolted access doors

QCLBSH Smoke & Heat Fans

Twin City Fan & Blower offers a specially modified version of the QCLB fan designated as "QCLBSH" (Mixed Flow Smoke and Heat Exhaust) for smoke control applications where temperatures can reach 1000°F. QCLBSH is available in sizes 90 through 600.

Model QCLBSH is cULus 705 listed and cULus listed for smoke control systems for 500°F for 4 hours or 1000°F for 15 minutes. Vertical roof mounted configuration, with discharge cap, meets UL 793 Snow Load Test requirements for butterfly dampers. QCLBSH is licensed to bear the AMCA certified ratings seal for sound and air performance.

The QCLBSH fan is available in all configurations with the exception of vertical down (VDO and VDI).

Standard Product Features

- Belt guard, ventilated (weather cover for VRM)
- Belt tube, sealed
- Two-groove drive minimum w/2.0 SF
- Cooling fins on wheel
- Stack cap with fusible link (for VRM)
- Continuously welded housing
- Bolted access door

OPTIONAL CONSTRUCTION

Spark Resistant Construction

Fan applications may involve the handling of fumes or vapors. Such applications require careful consideration by the system designer to insure the safe handling of such gases. Twin City Fan & Blower offers the following classifications of spark resistant construction per AMCA Standard 99-0401. It is the specifier's or the user's responsibility to specify the type of spark resistant construction with full recognition of the potential hazards and the degree of protection required.

Type B - The fan shall have a nonferrous wheel and nonferrous rub ring about the opening through which the shaft passes — usually aluminum wheel and rub ring and limited to 200°F. Consult factory for availability.

Type C - The fan is constructed so that a shift of the wheel or shaft will not permit two ferrous parts of the fan to rub or strike.

OSHPD Seismic Certification

Models QCLB, QCLBR and QCLBSH have been seismically tested and certified with the California Office of Statewide Health, Planning and Development (OSHPD) per OSP-0271-10. Seismic certification is limited to certain product options and configurations.

Housing

All fans are constructed of heavy-gauge steel and continuously welded for strength and rigidity. All fans are provided with punched inlet and outlet flanges as standard.

Belt Guard

Totally enclosed, sealed belt guard is standard on Model QCLB. Totally enclosed, non-sealed belt guard is standard on Models QCLBR and QCLBSH, and Model QCLB when an optional belt tube is provided. Belt guards meet OSHA requirements.

Adjustable Motor Base

A heavy-duty adjustable motor base provides easy and positive adjustment of belt tension.

Belt Tube

A belt tube encloses the belts and drive components, protecting them from the airstream on Models QCLBR and QCLBSH. A belt tube is an optional accessory on Model QCLB.

Bolted Access Door

Bolted access door allows for inspection and maintenance of internal fan components. A hinged access door is an available option.

Extended Lube Lines

Lube lines with grease fittings are extended to the outside of the fan housing on all models. Nylon lines are standard on Model QCLB. Models QCLBR and QCLBSH feature copper lube lines.

Straightening Vanes

Straightening vanes convert tangential velocity pressure into useful static pressure, reducing turbulence and increasing efficiency. Extensive testing of various shapes and locations has resulted in the most efficient aerodynamic design of the straightening vanes.

Drain (QCLBR)

A two inch drain allows drainage of grease to the lowest point of the fan. Drain is located 180° from the motor on vertical fans and at the lowest point of the housing on horizontal fans. A grease box with drain connection is an available option.

Universal Mounting Feet

Fan sizes 90-270 (non-curb mounted) come standard with eight mounting brackets and four universal mounting feet. This allows for easy mounting and motor position changes in the field.

Inlet and Outlet Flanges

Inlet and outlet flanges with prepunched mounting holes are standard on all sizes, providing a bolted connection to ductwork.

Clean Out Doors (QCLBR)

Two cleanout doors are located 180° apart, providing access to the wheel for cleaning.

Minimum 2-Groove Drive with 2.0 Service Factor (QCLBSH)

Drives on Model QCLBSH are provided with a minimum of 2-grooves and with a service factor of 2.0 or greater to meet UL requirements for smoke control systems.

Inner Cylinder

The inner tube is rigidly constructed to support the shaft and bearings. The removable discharge cone provides full access to the shaft, bearings and fan sheave. It is strongly recommended that an access door be provided in the ductwork adjacent to the discharge end of the fan for such service.

Bearings

Standard bearings are selected to exceed the L-10 life of 80,000 hours at the maximum operating speed.

Mechanical Run Test & Final Vibration Check

All fans are assembled for a mechanical run test and final balance prior to shipment. Vibration readings are taken on both fan bearings in the axial, horizontal and vertical directions at the specified speed. Fans are balanced to 0.15 in./sec. peak or less.

Shaft

Shaft diameters sized so that maximum operating speed does not exceed 70% of first critical speed.

Vertical Construction

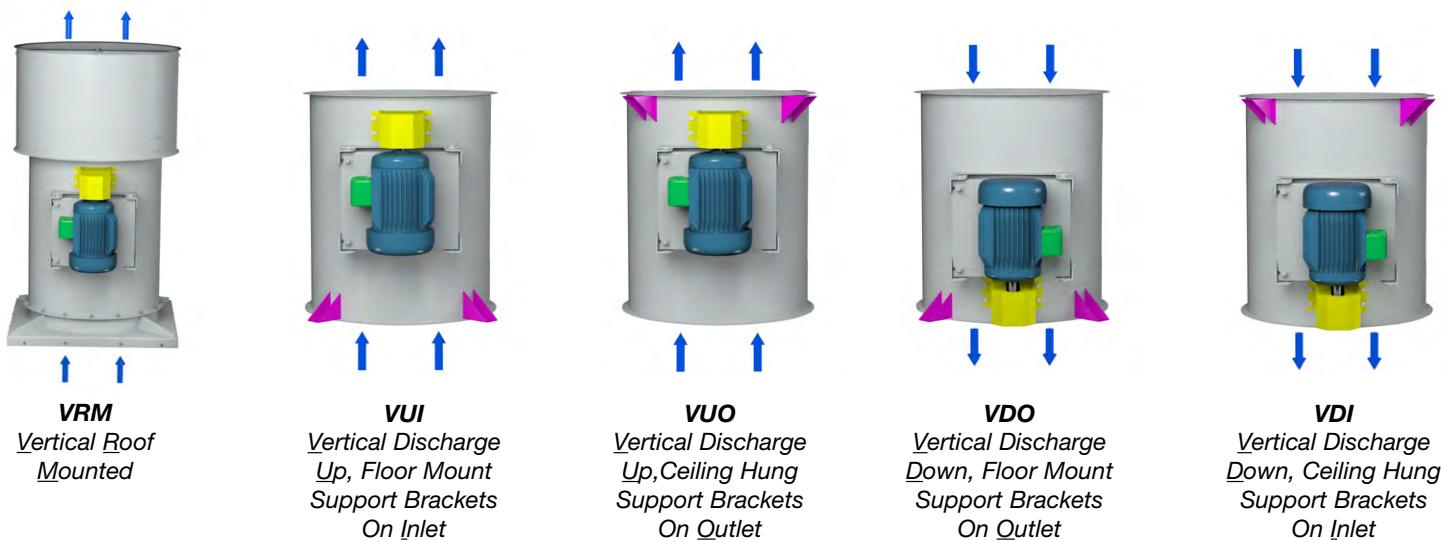

Vertical construction is available on sizes 90 through 600.

Floor or Ceiling Mounted (VUI/VUO/VDI/VDO) — Four vertical brackets are welded to either end of the fan housing. Bracket location is determined by airflow direction and support details (see drawing below).

Roof Mounted (VRM) — A curb cap provides a weathertight seal for roof curb mounted fans. A discharge cap and weather cover are also available for the upblast style roof ventilator.

Available Discharges by Model

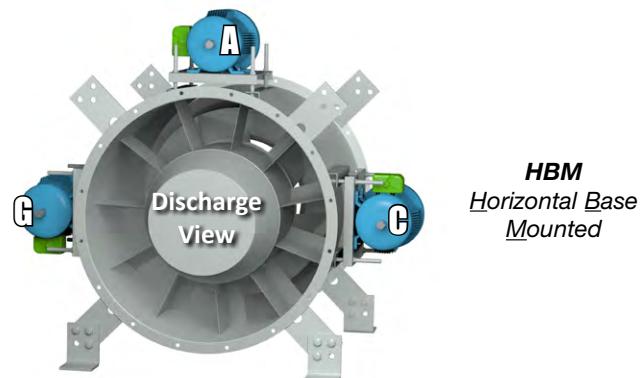

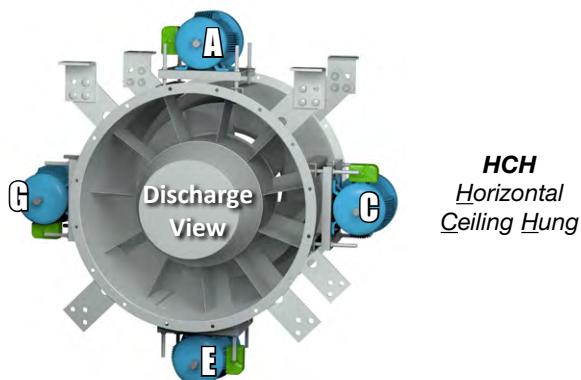

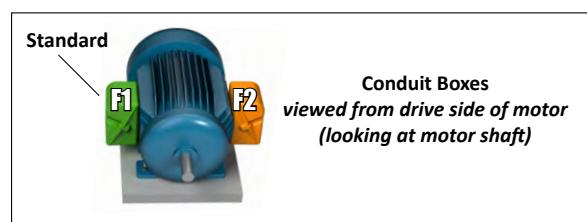

QCLB	QCLBR	QCLBSH
HBM	HBM	HBM
HCH	HCH	HCH
VDI	N/A	N/A
VDO	N/A	N/A
VUI	VUI	VUI
VUO	VUO	VUO
VRM	VRM	VRM

**Horizontal Construction**

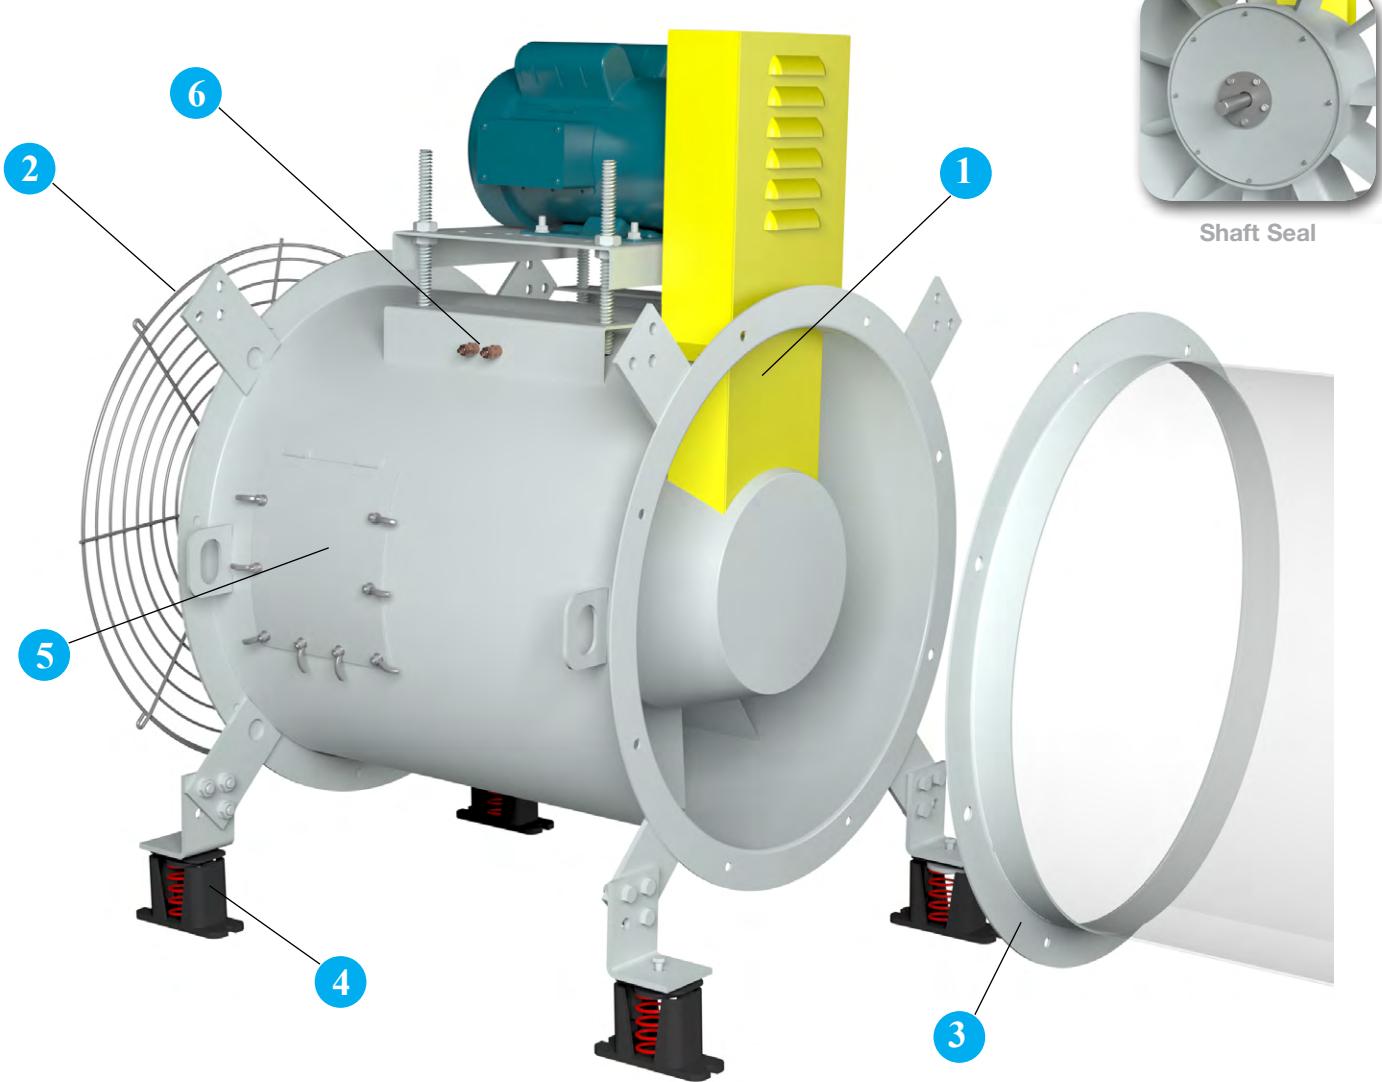

Horizontal construction is available on sizes 90 through 600.

Horizontal Base Mounted (HBM) — Support legs are provided at each end of the fan for floor mounting.

Horizontal Ceiling Hung (HCH) — For duct mounted fans, four suspension clips are welded to the fan casing to allow ceiling suspension using rod hangers. (Motor position E is not available on a Model QCLBR.)

OPTIONS/ACCESSORIES

1 Belt Tube A belt tube encloses the belts and drive components, protecting them from the airstream. A belt tube is an optional accessory on Model QCLB and standard on Models QCLBR and QCLBSH.

2 Inlet/Outlet Screens Safety screening can be provided for installation in the fan inlet or outlet.

3 Companion Flanges Inlet and outlet companion flanges are available for ease of duct connection. Companion flanges are rolled angle rings punched to match the standard inlet or outlet flange.

4 Spring Isolators Spring type vibration isolation mounts are available to reduce the transmission of fan vibration in 1" or 2" deflection. Spring isolators can be provided for floor mount or ceiling hung orientation.

5 Quick Open Access Door For quick wheel inspection and maintenance. Access doors are specified where examination and cleaning of the fan interior is required.

6 Extended Lube Lines Allow for easy lubrication of bearings on belt driven units without disassembly by extending polyethylene lines from fan bearings to exterior of the guard.

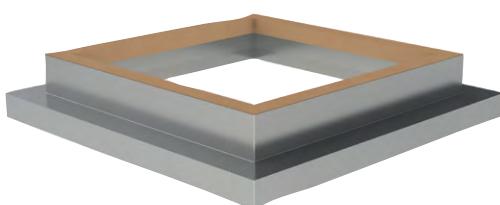

Other Accessories

- Floor Mounted Rubber Isolators
- Ceiling Hung Spring & Rubber Isolators
- Sound Attenuating Box
- Hinged Weather Cover
- Drain (QCLB & QCLBSH)
- Thrust Restraints
- Shaft Seal
- Piezometer Ring

- 1 Weather Cover** For outdoor installations, the weather cover completely encloses the motor and V-belt drive from the elements and is provided with slots for ventilation. Weather covers are available for either horizontal or vertical flow fans. Standard accessory on vertical roof mounted configuration.
- 2 Curb Cap** Attached to the fan's flange for curb mounting. Standard accessory on vertical roof mounted configuration.
- 3 Grease Box** The heavy gauge galvanized grease box is designed to trap the grease in and allow the water to run off onto the roof.
- 4 Bolted Access Door** Bolted access door allows for inspection and maintenance of internal fan components.

- 5 Discharge Cap** Discharge caps are provided as a standard accessory on vertical roof mounted configurations. Discharge caps feature butterfly type dampers that seal out weather when the fan is shut off. Butterfly dampers on Models QCLB and QCLBR open with airflow (see table 3 on page 12 for minimum flow rates required to open damper blades). Discharge caps on Model QCLBSH meet UL 793 requirements, providing a fusible link and spring assembly that forces the discharge butterfly dampers open when the fuse melts at 165°F. Discharge caps on QCLBSH meet snow load tests set forth by UL, IRI and SBCCI.
- 6 Magnetic Damper Latches** Magnetic latches are available to hold discharge cap butterfly dampers closed when not in operation.

Canted Roof Curbs

- Constructed of 18-gauge galvanized steel with continuous welded seams
- Large 3" built-in 45° cant to accommodate roofing material to top of curb. Cant is beveled at corners for better support of roofing material
- Wood nailer (1½") secured to top ledge
- Lined with 1½" fiberglass fire-resistant, sound-absorbing insulation
- Damper shelf standard
- **Options:** Aluminum (16-gauge) construction, Burglar security bars, Metal liner (galvanized or aluminum), Special heights up to 24", Single or double pitched curbs for sloping roofs

Self Flashing & Straight Sided Roof Curbs

- Constructed of 18-gauge galvanized steel with continuous welded seams
- Wide base plate (flashing) to insure watertight seal to roof
- Top ledge covered with $\frac{3}{16}$ " polystyrene gasket for weather seal and to reduce metal-to-metal conducted noise
- Lined with 1½" fiberglass fire-resistant, sound-absorbing insulation
- Damper shelf standard
- Straight-sided roof curbs are constructed with the same features as the self-flashing curbs, but are one dimensional to allow for field supplied cants and roofing material to be brought up to the top of the curb
- **Options:** Aluminum (16-gauge) construction, Burglar security bars, Metal liner (galvanized or aluminum), Special heights up to 24", Wood nailer (1½") secured to top ledge in lieu of polystyrene gasket, Single or double pitched curbs for sloping roofs

Self Flashing Vented Roof Curbs

For High Temperature Applications

- Completely assembled unit, easier to install and less expensive than a field constructed curb
- Constructed of 18-gauge galvanized steel with continuous welded seams and wide base flashing for watertight seal to roof
- Meets NFPA-96 code requirements
- Top ledge covered with $\frac{3}{16}$ " polystyrene gasket
- Furnished with ventilation slots

Curb Adapters

- Constructed of heavy-gauge galvanized steel with continuous welded seams
- Top ledge covered with $\frac{3}{16}$ " polystyrene gasket to reduce metal-to-metal conducted noise and act as a weather seal
- Available in enlarger or reducer (shown) models

Disconnect switches provide positive electrical shutoff during fan cleaning or maintenance.

NEMA 1 Disconnect Switch (Standard)

A NEMA 1 disconnect switch is available shipped loose for field mounting and wiring or factory mounted and wired with ODP or TEFC motors.

NEMA 1 Disconnect Switch

NEMA 3R Disconnect Switch

A NEMA 3R, rain proof, disconnect is available shipped loose for field mounting and wiring or factory mounted and wired externally.

NEMA 3R Disconnect Switch

NEMA 4 Disconnect Switch

A NEMA 4, water and dust tight, disconnect is available shipped loose for field mounting and wiring or factory mounted and wired externally.

NEMA 4 Disconnect Switch

NEMA 7/9 Disconnect Switch

A NEMA 7/9 disconnect switch is recommended on fans with explosion proof motors. The NEMA 7/9 switch is designed for use with fans operating in hazardous environments. Available shipped loose for field mounting and wiring. (Not shown.)

DIMENSIONS ARE SUBJECT TO CHANGE. CERTIFIED DRAWINGS AVAILABLE ON REQUEST.

NOTES:

- Fan shown in horizontal shipping position, universal mounting brackets allow for other mounting configurations.
- Sealed belt guard standard on QCLB, belt tube optional; OSHA type belt guard standard on QCLBR & QCLBSH with belt tube standard.
- Access door is optional for QCLB & QCLBSH; (2) clean out doors 90° from motor and 180° apart standard on QCLBR.
- Drain optional on QCLB & QCLBSH, standard on QCLBR
- (2) Locking collars required on vertical applications.
- For vertical applications remove support legs.

AS1002867E

DIMENSIONS ARE SUBJECT TO CHANGE. CERTIFIED DRAWINGS AVAILABLE ON REQUEST.

NOTES:

1. Curb cap and discharge cap are required.
2. Access door is optional for QCLB & QCLBSH; Two (2) clean out doors 90° from motor and 180° apart standard on QCLBR.
3. Two (2) locking collars required on vertical applications.
4. For vertical applications remove support legs.

Model QCLB

Fans shall be Model QCLB (standard mixed flow) of the non-overloading design, as manufactured by Twin City Fan & Blower, Minneapolis, Minnesota.

PERFORMANCE — Performance ratings shall conform to AMCA Standard 205 (fan efficiency grade), 211 (air performance) and 311 (sound performance). Fans shall be tested in accordance with ANSI/AMCA Standard 210 (air performance) and 300 (sound performance) in an AMCA accredited laboratory. Fans shall be licensed to bear the AMCA certified ratings seal for both sound and air, and fan efficiency grade (FEG). Sound certification shall apply to both inlet and outlet sound power levels.

Fans shall be designed for maximum efficiency. Fans shall have a sharply rising pressure characteristic extending through the operating range and continuing to rise well beyond the efficiency peak to assure quiet and stable operation under all conditions. Horsepower characteristics shall be truly self-limiting and shall reach a peak in the normal selection area.

Model QCLB shall be available UL 705 listed. Fans shall bear a permanently attached nameplate displaying model and serial number of the unit for future identification.

HOUSING — Housings shall be cylindrical and welded steel throughout. Inlets shall be fully streamlined. Housings shall be suitably braced to prevent vibration or pulsation. Totally enclosed belt guard shall enclose motor sheave and V-belt drives. Punched inlet and outlet flanges shall be equipped for duct mounting. Extended lube lines shall be provided for ease of lubrication. Model QCLB shall include bolted access door for inspection and maintenance of wheel.

WHEEL — Fan wheels shall have die-formed single thickness blades designed for maximum efficiency, and quiet and stable operation. Blades shall be continuously welded to the back plate and wheel cone. Wheels shall be statically and dynamically balanced and the complete fan assembly including motor and drive shall be test balanced at or near the operating speed at the factory prior to shipment.

SHAFT — Shafts shall be AISI 1040 or 1045 hot rolled steel, accurately turned, ground, polished, and ring gauged for accuracy. Shafts shall be sized for the first critical speed of at least 1.43 times the maximum speed.

BEARINGS — Bearings shall be heavy duty, grease lubricated, anti-friction ball or roller, self-aligning, pillow block type and selected for a minimum L-10 life of 80,000 hours at the maximum fan RPM. Bearings shall be equipped with extended lubrication lines with grease fittings outside of the fan housing.

DRIVE — Motor sheaves shall be cast iron, variable pitch on applications 10 HP and smaller, and fixed pitch on 15 HP and larger.

FINISH AND COATING — The entire fan assembly, excluding the shaft, shall be thoroughly degreased and deburred before application of a rust-preventative primer. After the fan is completely assembled, a finish coat of paint shall be applied to the entire assembly. The fan shaft shall be coated with a petroleum-based rust protectant. Aluminum components shall be unpainted.

FACTORY RUN TEST — All fans with motors and drives mounted by Twin City Fan & Blower shall be completely assembled and test run as a unit at the specified operating speed prior to shipment. Each wheel shall be statically and dynamically balanced in accordance with ANSI/AMCA 204-96 "Balance Quality and Vibration Levels for Fans" to Fan Application Category BV-3, Balance Quality Grade G6.3. Balance readings shall be taken by electronic type equipment in the axial, vertical, and horizontal directions on each of the bearings. Records shall be maintained and a written copy shall be available upon request.

GUARANTEE — The manufacturer shall guarantee the workmanship and materials for its QCLB Mixed Flow Fans for at least one (1) year from startup or eighteen (18) months from shipment, whichever occurs first.

TYPICAL SPECIFICATIONS

Model

QCLBR

Fans shall be Model QCLBR (restaurant) of the non-overloading design, as manufactured by Twin City Fan & Blower, Minneapolis, Minnesota.

PERFORMANCE — Performance ratings shall conform to AMCA Standard 205 (fan efficiency grade), 211 (air performance) and 311 (sound performance). Fans shall be tested in accordance with ANSI/AMCA Standard 210 (air performance) and 300 (sound performance) in an AMCA accredited laboratory. Fans shall be licensed to bear the AMCA certified ratings seal for both sound and air, and fan efficiency grade (FEG). Sound certification shall apply to both inlet and outlet sound power levels.

Fans shall be designed for maximum efficiency. Fans shall have a sharply rising pressure characteristic extending through the operating range and continuing to rise well beyond the efficiency peak to assure quiet and stable operation under all conditions. Horsepower characteristics shall be truly self-limiting and shall reach a peak in the normal selection area.

Model QCLBR shall be UL 762 listed for the exhaust of grease-laden air. Fans shall bear a permanently attached nameplate displaying model and serial number of the unit for future identification.

HOUSING — Housings shall be cylindrical and welded steel throughout. Inlets shall be fully streamlined. Housings shall be suitably braced to prevent vibration or pulsation. Totally enclosed belt guard shall enclose motor sheave and V-belt drives. Punched inlet and outlet flanges shall be equipped for duct mounting. Extended lube lines shall be provided for ease of lubrication. Model QCLBR shall include a belt tube, 2 wheel cleanout doors (located 180° apart) for inspection and maintenance of the wheel and a 2" drain.

WHEEL — Fan wheels shall have die-formed single thickness blades designed for maximum efficiency, and quiet and stable operation. Blades shall be continuously welded to the back plate and wheel cone. Wheels shall be statically and dynamically balanced and the complete fan assembly including motor and drive shall be test balanced at or near the operating speed at the factory prior to shipment. Wheels on model QCLBR shall have cooling fins to draw cool air over shaft and bearings.

SHAFT — Shafts shall be AISI 1040 or 1045 hot rolled steel, accurately turned, ground, polished, and ring gauged for accuracy. Shafts shall be sized for the first critical speed of at least 1.43 times the maximum speed.

BEARINGS — Bearings shall be heavy duty, grease lubricated, anti-friction ball or roller, self-aligning, pillow block type and selected for a minimum L-10 life of 80,000 hours at the maximum fan RPM. Bearings shall be equipped with extended lubrication lines with grease fittings outside of the fan housing.

DRIVE — Motor sheaves shall be cast iron, variable pitch on applications 10 HP and smaller, and fixed pitch on 15 HP and larger.

FINISH AND COATING — The entire fan assembly, excluding the shaft, shall be thoroughly degreased and deburred before application of a rust-preventative primer. After the fan is completely assembled, a finish coat of paint shall be applied to the entire assembly. The fan shaft shall be coated with a petroleum-based rust protectant. Aluminum components shall be unpainted.

FACTORY RUN TEST — All fans with motors and drives mounted by Twin City Fan & Blower shall be completely assembled and test run as a unit at the specified operating speed prior to shipment. Each wheel shall be statically and dynamically balanced in accordance with ANSI/AMCA 204-96 "Balance Quality and Vibration Levels for Fans" to Fan Application Category BV-3, Balance Quality Grade G6.3. Balance readings shall be taken by electronic type equipment in the axial, vertical, and horizontal directions on each of the bearings. Records shall be maintained and a written copy shall be available upon request.

GUARANTEE — The manufacturer shall guarantee the workmanship and materials for its QCLBR Mixed Flow Fans for at least one (1) year from startup or eighteen (18) months from shipment, whichever occurs first.

Model QCLBSH

Fans shall be Model QCLBSH (smoke and heat) of the non-overloading design, as manufactured by Twin City Fan & Blower, Minneapolis, Minnesota.

PERFORMANCE — Performance ratings shall conform to AMCA Standard 205 (fan efficiency grade), 211 (air performance) and 311 (sound performance). Fans shall be tested in accordance with ANSI/AMCA Standard 210 (air performance) and 300 (sound performance) in an AMCA accredited laboratory. Fans shall be licensed to bear the AMCA certified ratings seal for both sound and air, and fan efficiency grade (FEG). Sound certification shall apply to both inlet and outlet sound power levels.

Fans shall be designed for maximum efficiency. Fans shall have a sharply rising pressure characteristic extending through the operating range and continuing to rise well beyond the efficiency peak to assure quiet and stable operation under all conditions. Horsepower characteristics shall be truly self-limiting and shall reach a peak in the normal selection area.

Model QCLBSH shall be UL listed for Smoke Control Systems (500°F for 4 hours and 1000°F for 15 minutes). Fans shall bear a permanently attached nameplate displaying model and serial number of the unit for future identification.

HOUSING — Housings shall be cylindrical and welded steel throughout. Inlets shall be fully streamlined. Housings shall be suitably braced to prevent vibration or pulsation. Totally enclosed belt guard shall enclose motor sheave and V-belt drives. Punched inlet and outlet flanges shall be equipped for duct mounting. Extended lube lines shall be provided for ease of lubrication. Model QCLBSH shall include a belt tube for the protection of belts and drive components from the airstream and bolted access door.

WHEEL — Fan wheels shall have die-formed single thickness blades designed for maximum efficiency, and quiet and stable operation. Blades shall be continuously welded to the back plate and wheel cone. Wheels shall be statically and dynamically balanced and the complete fan assembly including motor and drive shall be test balanced at or near the operating speed at the factory prior to shipment. Wheels on model QCLBSH shall have cooling fins to draw cool air over shaft and bearings.

SHAFT — Shafts shall be AISI 1040 or 1045 hot rolled steel, accurately turned, ground, polished, and ring gauged for accuracy. Shafts shall be sized for the first critical speed of at least 1.43 times the maximum speed.

BEARINGS — Bearings shall be heavy duty, grease lubricated, anti-friction ball or roller, self-aligning, pillow block type and selected for a minimum L-10 life of 80,000 hours at the maximum fan RPM. Bearings shall be equipped with extended lubrication lines with grease fittings outside of the fan housing.

DRIVE — Motor sheaves shall be cast iron, variable pitch on applications 10 HP and smaller, and fixed pitch on 15 HP and larger. Model QCLBSH shall be equipped with a two-groove drive minimum.

FINISH AND COATING — The entire fan assembly, excluding the shaft, shall be thoroughly degreased and deburred before application of a rust-preventative primer. After the fan is completely assembled, a finish coat of paint shall be applied to the entire assembly. The fan shaft shall be coated with a petroleum-based rust protectant. Aluminum components shall be unpainted.

FACTORY RUN TEST — All fans with motors and drives mounted by Twin City Fan & Blower shall be completely assembled and test run as a unit at the specified operating speed prior to shipment. Each wheel shall be statically and dynamically balanced in accordance with ANSI/AMCA 204-96 "Balance Quality and Vibration Levels for Fans" to Fan Application Category BV-3, Balance Quality Grade G6.3. Balance readings shall be taken by electronic type equipment in the axial, vertical, and horizontal directions on each of the bearings. Records shall be maintained and a written copy shall be available upon request.

GUARANTEE — The manufacturer shall guarantee the workmanship and materials for its QCLBSH Mixed Flow Fans for at least one (1) year from startup or eighteen (18) months from shipment, whichever occurs first.
