

Low-Pressure Spray Foam

FROTH-PAK™ Systems

FROTH-PAK™ Polyurethane Foam Systems are ready to quickly and professionally fill your needs. FROTH-PAK™ foam is a two-component, quick-cure polyurethane foam that fills cavities, penetrations and cracks for air sealing, insulation, sound damping, structural stabilization and more. Designed for mobility and ease of use, FROTH-PAK™ foam is an ideal choice for penetrations greater than 2”.

FROTH-PAK™ foam ...

- Adheres to many surfaces, including wood, metal, glass and most plastics
- Becomes tack-free in less than a minute
- Cures in minutes, depending on temperature, foam thickness and specific nozzle
- Comes with flexible, pre-attached hoses for quicker start-up
- Kits have a temperature indicator to help assure maximum product performance

Advantages of Dow FROTH-PAK™ Systems

- All-in-one insulation and air sealant that helps prevent air infiltration, moisture intrusion and much more
- Chemically cured, reducing curing time
- Patented anti-crossover nozzles –widest selection available in the industry today
- Self-contained kits and refillable canisters
- Variety of convenient sizes for smaller jobs and larger use demands
- Low maintenance and parts replacement costs
- Portable with no mixing, set-up or warm-up necessary
