

1600 Series In-Line Pump

Taco 1600 Series In-Line Pumps combine the ultimate in reliability with ease of installation and maintenance, for heating, air conditioning, pressure boosting, cooling water transfer and water supply applications. Quiet, dependable and proven performance makes the 1600 Series Pump the right choice. Available in 50 Hz and 60 Hz.

Features & Benefits

Quiet, dependable power and proven performance.

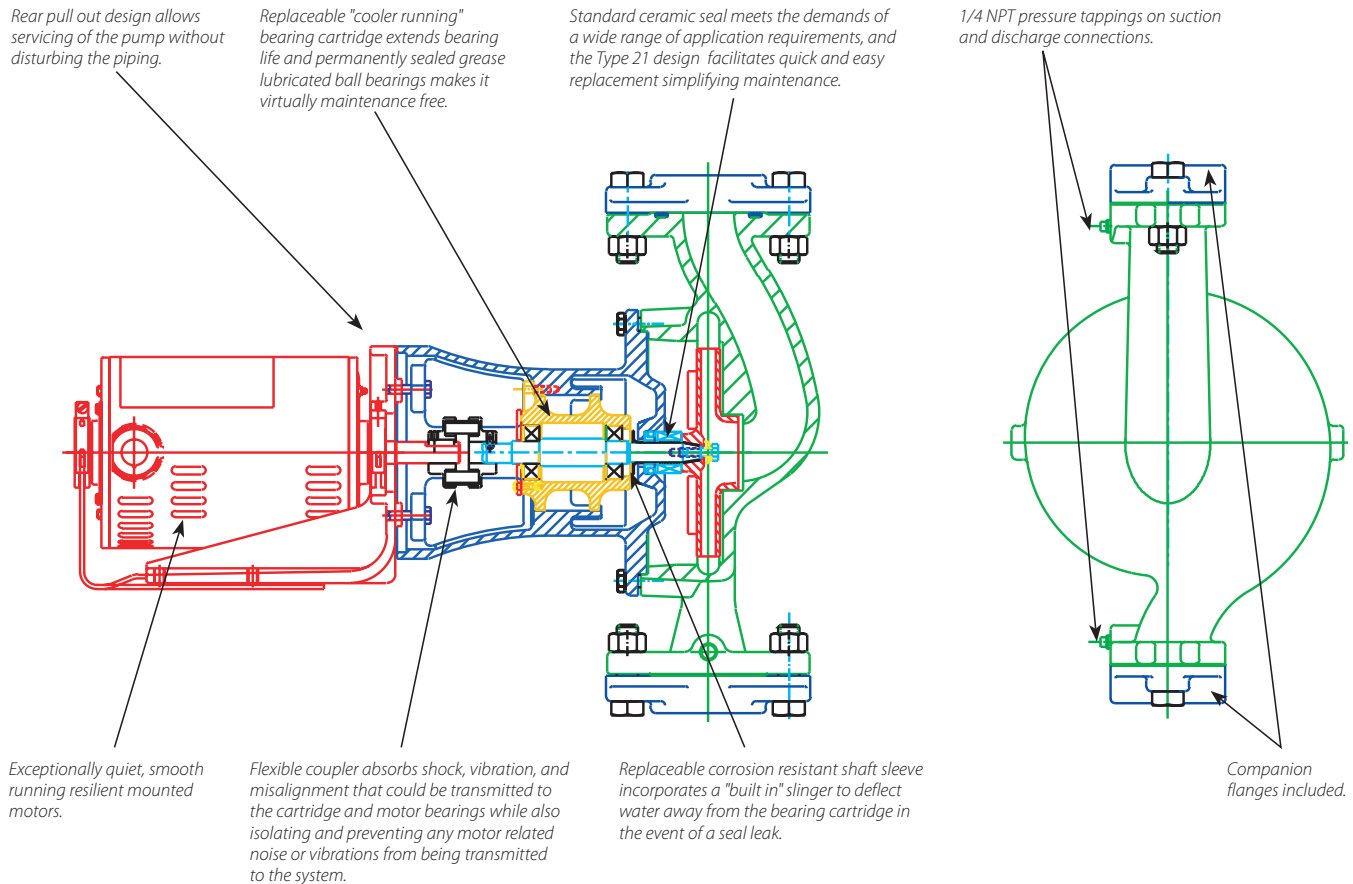

1600 Series In-Line pumps meet the latest industry standards for hydraulic performance and reliability. Each is backed by Taco Comfort Solutions a worldwide leader in the design and manufacture of heating and cooling equipment for more than 90 years. Taco "1600" Series In-Line pumps are available in 15 models ranging in size from 1 1/2" X 1-1/2" to 2" X 2" with a flow range

from 10 to 235 GPM and head capacities up to 68 feet.

Taco 1600 Series In-Line pumps utilize an exclusive replaceable, cooler running bearing cartridge design. This unique design isolates the bearings from the effects of system fluid temperatures which greatly extends bearing life. The cartridge design incorporates **permanently sealed** grease lubricated ball bearings making it virtually maintenance free. All 1600 series In-Line Pumps are

furnished with ceramic seals (standard) in order to meet a wide range of application requirements. The standard mechanical seal is an industry-standard Type 21 design consisting of the rotating element (SS spring & retainer, EPT elastomers, and carbon mating ring) and ceramic seat.

The standardized cartridge design simplifies maintenance with minimal parts requirements, one size cartridge and mechanical seal to service the entire product line.

Features

Rugged Casing Design

Cartridge Assembly

Pressure Tappings

One Piece Enclosed Impeller

Cupro-Nickel Shaft Sleeve

Standard Mechanical Seal

Flexible Coupler

Resilient Mounted Motor

Parts Flexibility

Factory Tested

Benefits

The 1600 Series has a maximum operating pressure of 175psi, and a maximum operating temperature of 300°F. The 1600 Series is available in cast-iron stainless steel fitted construction or all stainless steel construction.

Replaceable "cooler running" bearing cartridge extends bearing life, and with permanently sealed greased lubricated ball bearings it is virtually maintenance free.

Pressure tappings allow for differential pressure readings to be taken across the pump.

Dynamically balanced stainless steel impeller assures long life and higher pump efficiencies.

Non corrosive shaft sleeve protects the shaft by preventing contact between the shaft and system fluid eliminating the need for more expensive corrosion resistant shaft materials.

1600 Series In-Line pumps utilize a Type 21 seal design which facilitates quick and easy replacement. Available in ceramic (standard) or the new "Sealide C" (for more aggressive system fluids) ensures the flexibility to meet a wide range of application requirements. One size seal fits all models.

Flexible coupler absorbs shock, vibration and misalignment that could be transmitted to the cartridge and motor bearings while also isolating and preventing any motor related noise or vibrations from being transmitted to the system.

Resilient mounted motor insures quiet reliable vibration free operation of the pump.

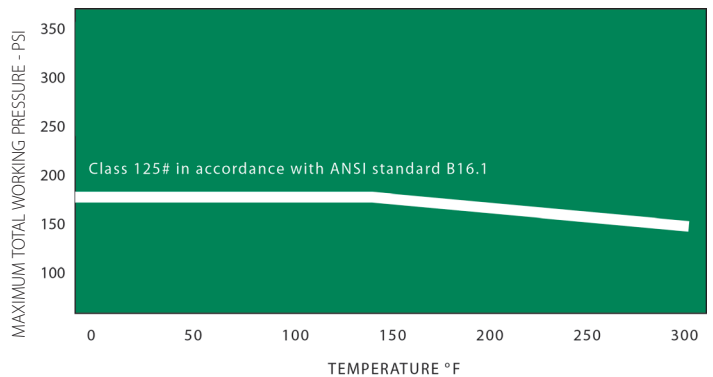

Superior parts flexibility: one cartridge, one seal, and two motor frames fit all pump models.

All 1600 series pumps are factory tested, and are built in accordance with Hydraulic Institute Standards.

Operating Specifications

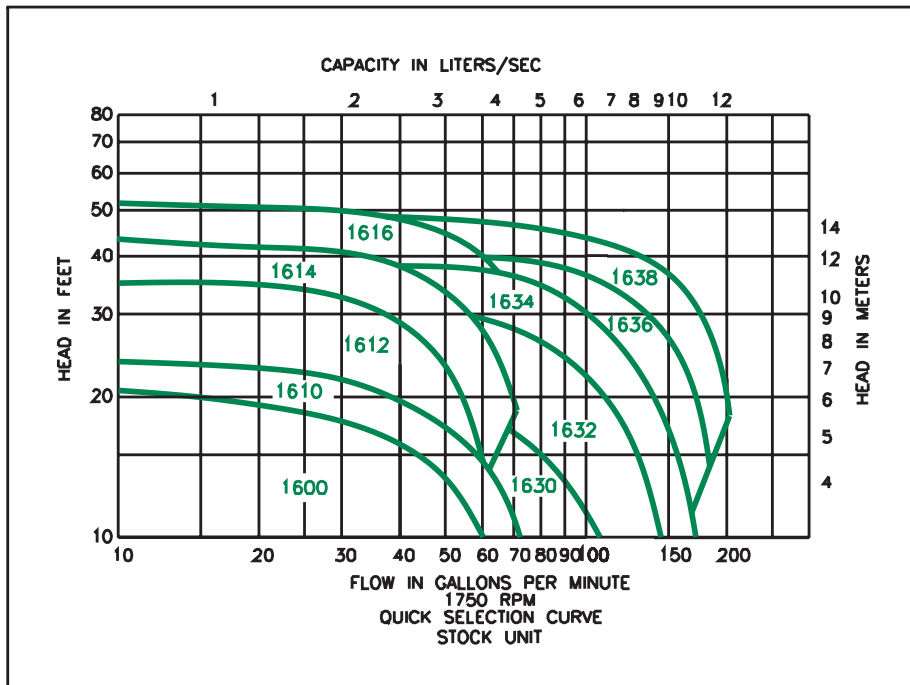

Description	Standard	Optional
Pressure	175psi Maximum Operating Pressure (125psi Flanges Standard)	---
Temperature Mechanical Seal	250°F	300°F
Motors	Nema Standard, Resilient Mounted	Special Enclosures
Coupler	Flexible Type	---
Pump Bearings	Ball Bearing Replaceable Cartridge	---
Pressure Tappings	Tapped Suction & Discharge Ports Provided as Standard	---
Pump Flanges	Available with the Pump	---

Pressure Temperature Ratings

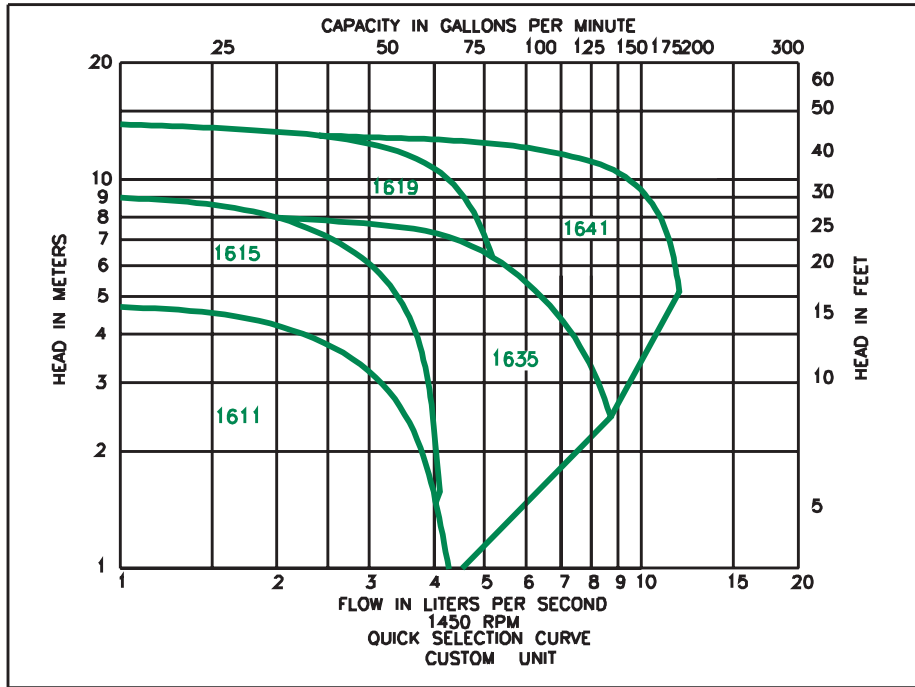

1600 Series Performance Field 1450 RPM 50 Hz

Curves also available on TacoNet®.

1600 Series Performance Field 1750 RPM 60 Hz

Curves also available on TacoNet®.

Applications

LoadMatch® Systems	Cooling Towers
Air Conditioning Systems	Golf Courses
Recirculation	Dry Cleaning Plants
Booster Service	Livestock Watering
Heating Systems	Bottle Washers
Laundry Equipment	Lawn Sprinklers

Materials of Construction

Description	Standard	Optional	NSF 61
Casing	Cast Iron	SS (304)	SS (304)
Impeller	Cast SS (304)	---	SS (304)
Shaft	Hardened Alloy Steel	SS (416)	SS (416)
Shaft Sleeve	Cupro-Nickel	---	Cupro-Nickel
Bracket	Cast Iron	Cast Iron with SS Face Plate	Cast Iron with SS Face Plate

eLink[®] Taco Connectivity

Taco Tags use the power of NFC technology to provide users with all the relevant documents for a specific product, right on their phone. Your digital document library will always be accessible with the most up to date documentation and product information for that specific piece of equipment.

Utilizing the power of Taco Tags to provide you with all of your documentation needs, Taco is ensuring our user base is informed to take control of their equipment.

eLink provides easy access to product specs, technical documentation, instruction manuals and much more. Stay tuned as we continue to grow the eLink offerings on Taco commercial equipment.
