LCS™

(LARGE CEILING SYSTEMS)

DX R-410A

Product Description

Performance and Electrical Data

*... the pioneer and builder of the
most complete line of
precision cooling equipment*

Data Aire's first precision cooling system was developed by data processing engineers who sought optimum environmental conditions for early computers. It was clear that "people comfort" air conditioning systems were unable to meet the environmental requirements of computers and data processing equipment. Precision environmental control equipment with high sensible cooling ratios was a necessity. Problems with paper sticking, head crash, and static electricity were eliminated. Humidity fluctuation were controlled saving possible electrical and mechanical failures and more importantly – Downtime. Data Aire's innovative response to the challenge of eliminating problems within the computer room environment was the start of wide use precision cooling.

As in the past, Data Aire is meeting today's challenge of not only the computer room but also the ever expanding telecommunications industry where precision cooling is vital to our everyday communications. Telecommunication equipment requires a controlled environment with clean and properly distributed air. As in the computer room, the environment must be precisely controlled – 24 hour a day, 365 days a year.

Data Aire produces solutions. We have offered environmental control solutions to meet specific needs in the smallest of places and in areas of thousands of square feet. We are prepared to assist you, your in-house engineering department, consulting engineer, or construction department in defining the proper solutions and bringing them to a predefined outcome.

Data Aire is committed to being the supplier of choice for environmental process cooling with flexibility, reliability, and expertise required to meet our customer's needs. To be successful, it is essential to be creative and use our resources to their fullest capabilities. The Data Aire goal is to benefit the employees, partners, and most of all – our customers with honesty and integrity.

Data Aire Delivers!

PRECISION COOLING

LCS is a precision environmental control systems that bring a standard of reliable performance required by today's market demands; Small and medium size data centers, telecommunication sites, or where floor space is not available and larger tonnage units are required. Designed for ducted above ceiling applications, the LCS may be ordered as an air or water/glycol cooled direct expansion unit with single or dual compressors. Chilled water units are also available. Each LCS unit is factory run tested and put through a rigorous quality control procedure.

COMFORT

Computer rooms, telecommunication sites, and other environmentally controlled spaces require air which is clean and properly distributed, with precisely controlled temperature and humidity. Building or "people comfort" systems are not designed to meet these demands. LCS is designed to meet these goals.

CONTROL

The heart of the LCS is the *Mini dapTM4*, a microprocessor based controller designed for precision environmental control. The *Mini dap4* not only controls and monitors temperature, humidity, airflow, and cleanliness, it provides alarm history and automatic self-tests. All information is provided on a liquid crystal display (LCD).

DATA AIRE DELIVERS

Engineered for high performance and reliability, each LCS comes with Data Aire's commitment to excellence. This commitment began with Data Aire's first process cooling unit and has continued for more than 30 years of building the industry's finest precision control equipment. Standard ship cycle is 30 days from date of order. With Data Aire's optional "quick ship" program, units can be expedited to ship in as little as one week. All units are built to your specific order. Call your nearest Data Aire representative for more information.

TABLE OF CONTENTS

Design Features.....	6
Control System	8
Options	10
Model Identification.....	11
Performance Data	
Air Cooled.....	12
Water/Glycol Cooled	36
Chilled water.....	52
Dimensional and Weight data	58

CABINET

The heliarc welded tubular steel frame provides maximum strength and ease of service access. Removable panels of galvanized steel are insulated with 1 inch thick, 1-1/2 pound density insulation for thermal protection and sound attenuation. All parts are easily accessible. The electrical panel is hinged and swings out for servicing.

COIL SECTION

Designed for draw through application, the computer selected coil offers greater efficiency in the cooling and dehumidification process. Air bypass is provided to prevent saturated air from being introduced into the controlled space. The coil section is provided with a stainless steel drain pan.

FAN SECTION

The centrifugal, forward curved, double width, double inlet blower configuration is engineered for quiet reliable operation. The belt driven variable pitch drive section provides adjustable air flow capability to match load requirements of the controlled space. The draw through design insures even air distribution across the coil and bypass, low internal cabinet losses, and static sealing of the filter section. Motors are mounted on an adjustable slide base and have internal overload protection.

FILTER SECTION

Units are provided with 4 inch deep pleated design, MERV 8 filters (based on ASHRAE Std. 52.2). The filter section is an integral part of the system and is accessible from either side.

REHEAT

Two stage electric reheat is standard. Low-watt density finned tubular sheathed coils are constructed of stainless steel and sized to maintain room dry bulb conditions during a call for dehumidification. Low-watt density coils eliminate ionization associated with open air electric resistance heating.

REFRIGERATION CIRCUIT

LCS is available with either a single or dual refrigeration circuit. The refrigeration circuit includes a hermetic scroll compressor. These durable, heavy duty, fully welded compressors have no gaskets or seals, eliminating the possibility of refrigerant or oil leaking into the controlled space or environment. Scroll compressors also bring a combination of reliability, efficiency, and improved system sound performance. The refrigeration circuit includes built-in compressor overload protection, crankcase heater, filter drier, sight-glass, adjustable expansion valve with external equalizer, low pressure override timer (air cooled units), manual reset high pressure control, and compressor short cycle timer.

Water/glycol cooled units include a plate fin condenser sized to provide the required capacity for heat rejection with minimum water/glycol flow and low total pressure drop. Head pressure regulating valves control the condensing temperature and maintain required capacity at various water/glycol flow rates and temperatures.

Air Cooled with Remote Outdoor Condenser - A wide range of outdoor condensers are available. Condensers are manufactured by Data Aire and sized to meet heat rejection and ambient conditions as required. The industrial duty design includes galvanized corrosion resistant housing, aluminum finned copper tube coils, coated fan guards, energy efficient thermally protected direct drive motors, and variable fan speed control on lead motor for proper control down to -20° F ambient temperatures. Additional fan motors are controlled with ambient thermostats.

Air Cooled with Outdoor Condensing Unit - When compressors are required to be out of the controlled space, LCS is available with a remote outdoor condensing unit. The condensing unit includes hermetic scroll compressor(s) with built-in overload protection, crankcase heater, filter drier, sight-glass, and condenser coil. The coil is constructed with copper tubes and aluminum fins. The housing is galvanized steel with vertical air discharge. The condenser fan motor is variable speed type for head pressure control down to -20° F ambient temperatures. Additional fan motors are controlled by ambient fan thermostats.

Water/Glycol Cooled with Remote Outdoor Dry Cooler - Remote outdoor dry coolers are available in a variety of sizes. Each dry cooler includes galvanized corrosion resistant housing, aluminum finned copper tube coil, coated fan guards, surge tank, pump contactor, and energy efficient thermally protected direct drive motors. Dry coolers with multiple motors have cycling control.

CHILLED WATER SYSTEMS

Chilled water systems include all the same features of the LCS product line. Designed for draw through application, the computer selected coil offers greater efficiency in the cooling and dehumidification process. Air bypass is provided to prevent saturated air from being introduced into the controlled space. Chilled water flow is controlled by a 3-way chilled water valve for accurate and economical temperature control and dehumidification.

SYSTEM CONTROL

Unit control is maintained with the microprocessor based *Mini dapTM4*. The *Mini dap4* is an advanced controller with 50 MHz, 32 bit microprocessor and is comprised of three components, a wall mounted display module, a control module mounted inside the unit and a remote temperature and humidity sensor. The *Mini dap4* monitors the controlled environment's temperature, humidity, air flow, and cleanliness, but also provides alarm history and an automatic self-test of the microprocessor on system start-up. Multiple messages are displayed by automatically scrolling from each message to the next. All messages are presented in a clear vernacular format on the liquid crystal display (LCD). Multiple alarms are displayed sequentially in order of occurrence.

OPERATION - Holding down the "ESC" button for a minimum of five seconds activates the *Mini dap4*, push buttons allow menu selection for programming, operational information, diagnostics, and historical data. The two-level password feature prevents unauthorized access. Menu programmed information for basic system operation and alarm parameters is nonvolatile.

PROGRAMMABLE FUNCTIONS :

Temperature Setpoint	Temperature Deadband
System Start Delay	Low Temperature Alarm Limit
Humidity Deadband	Humidity Setpoint
High Humidity Alarm Limit	Low Humidity Alarm Limit
Define Password	Reset Equipment Runtimes
Audio Alarm Mode	Compressor Short Cycle Alarm
Humidity Anticipation	Compressors(s)
Calibrate Temperature Sensor	Temperature Scale
High Temperature Alarm Limit	Water Valve Voltage Range*
Firestat Temperature Alarm Limit	Manual Diagnosis
No water flow alarm action*	Remote Alarm contacts
Calibrate Discharge Air Sensor*	Person to contact on Alarm
Compressor Lead/Lag Sequence*	Dehumidification Mode
Power Problem or Restart Mode	Scheduled Normal Maintenance
Reheat mode	Calibrate Humidity
Humidifier	Compressor Assists to Energy Saver*
Network Protocol	Low Discharge Temperature Alarm Limit*
Calibrate Chilled Water Temperature Sensor*	

DISPLAYED CONDITIONS, DATA, and FUNCTIONS:

Temperature setpoints	Humidity setpoint
Current temperature	Current humidity
Cooling 1, 2 (as applicable)	Reheat
Humidification	Dehumidification

ALARMS - Alarm conditions are displayed and monitored on the microprocessor LCD along with an audible alarm. The alarm silence switch will quiet the audible alarm but the display will continue to indicate the alarm condition until it is corrected. The following alarms are displayed:

High temperature warning	High humidity warning
Low temperature warning	Low humidity warning
High pressure compressor	High condensate water level
Firestat tripped	No air flow
Compressor short cycle	Low voltage warning
Temperature sensor error	Power failure restart
Humidity sensor error	Local alarms
Maintenance required	Person to contact on alarm

* - Some of the programmable elections, displays or alarms may require additional components or sensors.

SYSTEM CONTROL, *continued*

HISTORICAL DATA:

- | | |
|---|---------------------------------|
| High/low temperature last 24 hours | High/low humidity last 24 hours |
| Blower, compressor 1, compressor 2*, reheat, dehumidification, Energy Saver*, Equipment runtimes for: | |
| Humidifier, and chilled water * | Low temperature last 24 hours |
| Alarm history (last 100 alarms) | High humidity last 24 hours |

Control Module

Temperature and Humidity Sensor

Display Module

Button Functions

 <i>Alarm</i>	Allows viewing of active alarms Silences audible alarms Resets active alarms		Allows scrolling to next screen Allows values changes (increase)
 <i>Menu</i>	Allows entry to Main Menu		Allows entry to Menus Advances cursor
 <i>Esc</i>	Return to previous screen Hold five seconds to turn ON or OFF		Returns to previous screen Allows value changes (decrease)

Energy Saver Coil - An *Energy Saver Coil* can be provided integral to the unit matching the nominal capacity. *Energy Saver* cooling is available whenever the incoming water/glycol temperature is below the setpoint of the water sensing changeover thermostat. The water sensing changeover thermostat is factory set at 45° F/7.2° C. The water sensing changeover thermostat is field adjustable. The *Energy Saver* operates during a need for cooling. The *Energy Saver* valve will open at setpoint plus deadband. When the space temperature falls to setpoint, the valve will close and the space is considered satisfied. While in *Energy Saver* mode with the valve open, if the incoming water/glycol temperature rises 3° F above the setpoint (of the water sensing thermostat), the *Energy Saver* valve will close and DX (mechanical) cooling will begin. Option includes a 3-way pressure control valve on the condenser water circuit(s) and a 3-way valve for the economy coil. Common piping for the coil and condensers is provided.

Auxiliary Chilled Water Coil - Where an existing chilled water loop is available, units can be fitted with an auxiliary chilled water coil. Units will operate using the chilled water for cooling. Upon a loss of water flow or an increase in room temperature the system will bring on compressor (DX) cooling. The Auxiliary Chilled Water Coil option includes the next size motor. Separate piping is provided for the chilled water coil and refrigeration connections on air cooled units or water circuit(s) on water/glycol cooled units.

Unit Mounted Temperature and Humidity Sensors - Temperature and humidity sensors may be ordered for unit mounting in the return air.

Unit Mounted Disconnect - A unit mounted nonautomatic disconnect switch is installed in the high voltage electrical section. The operating mechanism prevents access to the high voltage electrical components until switched to the "OFF" position. The operating mechanism (handle) protrudes through the exterior unit panel.

Hot Water Reheat - Where hot water is available, a water coil for reheat is offered. The coil is designed for 150 psi maximum water pressure and includes a 2-way valve (a 3-way is also available). Units with the hot water reheat do not include electric reheat.

Hot Gas Reheat - The unit's hot gas discharge may be used for reheat for maximum system efficiency.

Steam Generator Humidifier - Units may be furnished with an electric steam generator humidifier with "quick change" disposable cylinders and auto-

flush cycle. The steam generator humidifier with its patented control system optimizes cylinder life by concentrating incoming water to a predetermined conductivity much higher than that of any entering water. The control system continuously monitors the conductivity in the cylinder through its electronics which allows water to be flushed as often as is necessary to maintain the level at this design conductivity. The high design conductivity results in a minimum flushing of heated water which saves energy. The humidifier is designed to allow all units at any voltage to produce full rated steam output at an optimum low water level. Available in 10 and 30 pound per hour capacities.

Hot Gas Bypass - A hot gas bypass valve is available for applications that create low suction pressure conditions that could lead to coil freeze and/or compressor cycling. In facilities such conditions generally exist in instances where; 1) a unit's dehumidification mode needs to run for extended period of time; or 2) a room is designed for low entering air conditions; or 3) a unit is utilizing an oversized condenser at low outdoor ambient conditions

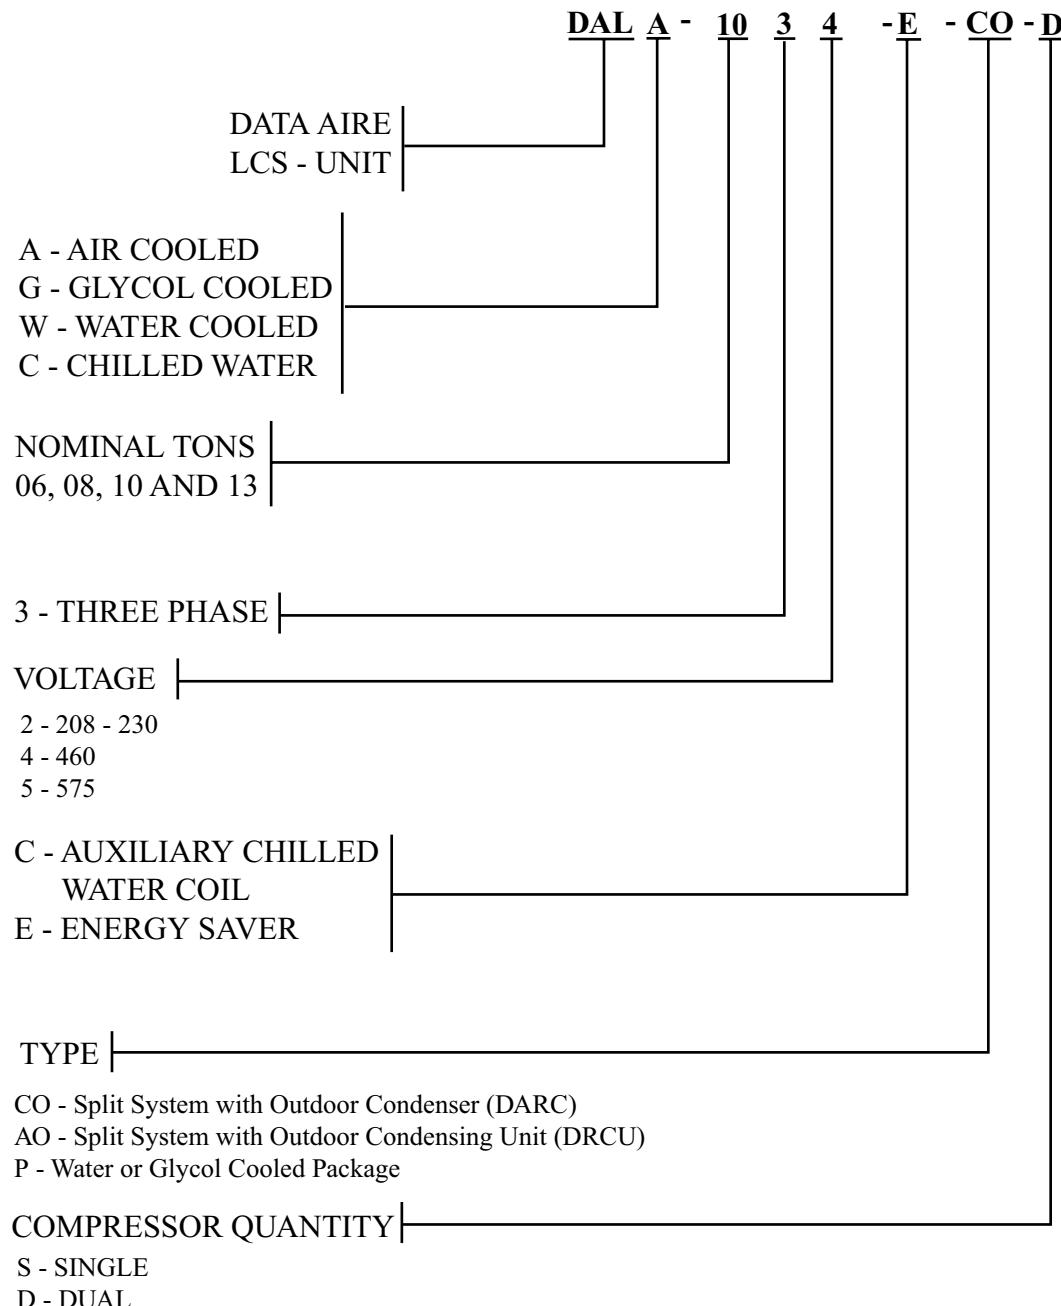

3-Way Water Regulating Valve - A 3-way water regulating valve for pressure control may be ordered to replace standard 2-way valve installed in the unit. The 3-way valve controls the water/glycol flow rate to maintain the required capacity under varying conditions.

Condensate Pump - Condensate pumps available for field installation. Pumps should be mounted on the side of unit. Option 210, side mounting kit, is available for easy mounting. Condensate pumps are complete with sump, motor, and automatic control. The pumps are rated for 130 GPM @ 20 foot maximum or 40 GPH @ 20 feet with check valve. Pumps shipped loose are available in 115, 230, or 460 volt.

Extended Compressor Warranty - An extended compressor warranty for a period of four (4) years is available in addition to the standard eighteen (18) month warranty, from date of shipment. The warranty is for replacement of compressors and does not include labor.

AIR COOLED with SINGLE COMPRESSOR

Model	Length	Width	Height	Operating Weight	Shipping Weight
DALA-06xx-CO-S	72.00	48.00	28.50	855	975 lbs
DALA-08xx-CO-S	72.00	48.00	28.50	955	1,075 lbs
DALA-10xx-CO-S	72.00	48.00	28.50	980	1,100 lbs
DALA-13xx-CO-S	72.00	48.00	28.50	1,015	1,135 lbs

AIR COOLED with DUAL COMPRESSORS

(using remote air cooled condenser)

Model	Length	Width	Height	Operating Weight	Shipping Weight
DALA-06xx-CO-D	72.00	48.00	28.50	890	1,010 lbs
DALA-08xx-CO-D	72.00	48.00	28.50	915	1,035 lbs
DALA-10xx-CO-D	72.00	48.00	28.50	990	1,110 lbs
DALA-13xx-CO-D	72.00	48.00	28.50	1,025	1,145 lbs

AIR COOLED with SINGLE COMPRESSOR

(using outdoor condensing unit)

Model	Length	Width	Height	Operating Weight	Shipping Weight
DALA-06xx-AO-S	72.00	48.00	28.50	755	875 lbs
DALA-08xx-AO-S	72.00	48.00	28.50	850	970 lbs
DALA-10xx-AO-S	72.00	48.00	28.50	950	1,070 lbs
DALA-13xx-AO-S	72.00	48.00	28.50	980	1,100 lbs

AIR COOLED with DUAL COMPRESSORS

(using outdoor condensing unit)

Model	Length	Width	Height	Operating Weight	Shipping Weight
DALA-06xx-AO-D	72.00	48.00	28.50	790	910 lbs
DALA-08xx-AO-D	72.00	48.00	28.50	885	1,005 lbs
DALA-10xx-AO-D	72.00	48.00	28.50	985	1,140 lbs
DALA-13xx-AO-D	72.00	48.00	28.50	1,015	1,135 lbs

WATER/GLYCOL COOLED with SINGLE COMPRESSOR

Model	Length	Width	Height	Operating Weight	Shipping Weight
DAL*-06xx-P-S	72.00	48.00	28.50	1,005	1,125 lbs
DAL*-08xx-P-S	72.00	48.00	28.50	1,105	1,225 lbs
DAL*-10xx-P-S	72.00	48.00	28.50	1,160	1,280 lbs
