Ovens/Incubators/Furnaces

Hach offers Natural convection ovens and muffle furnaces. Natural convection ovens are ideal for drying, sterilizing, baking, annealing, conditioning, evaporating, and dehydrating. Natural convection oven provides fast, electronically controlled drying. Muffle furnaces are specifically designed for ashing organic and inorganic samples, determining volatile and suspended solids, gravimetric analysis, heat treating of small steel parts, and ignition tests.

The Model LI6P and HRI3P B.O.D. incubators are Peltier thermoelectric cooled, eliminating the need for a refrigeration compressor. The incubators include a mechanical convection system to ensure even air distribution, digital temperature set controller, over temperature limit control, and a temperature display.

Part Number	Dimensions (H x W x D)	Accuracy 2	Electrical Specifications	Range	USD Price
1428900	483 mm x 356 mm x 305 mm	± 15 °C	120 Vac, 50/60 Hz		Contact Hach
2636300			Volts: 100-120V Hertz: 50/60 Watts: 360W (7.0A)		Contact Hach
1429600			120 Vac, 50/60 Hz		Contact Hach
2636202			Volts: 200-240V Hertz: 50/60 (2.0A)		Contact Hach
1428902	123 mm x 90 mm x 78 mm	± 15 °C	240 Vac, 50/60 Hz		Contact Hach
