Refractometers

Measure refractive index in the lab or field with our handheld Digital Refractometers. Featuring small, light weight and as simple to use design, these digital refractometers provides automatic calibration, automatic temperature compensation and automatic shutoff. Sample size can be as small as 1 mL. The temperature is initially displayed followed by the measurement results.

A Handheld Optical refractometer is also available with a dual range of salinity and specific gravity.

Part Number	Measurement Method	Range 2	Accuracy 2	Resolution	USD Price
25128000	Salinity				Contact Hach
2300051	Brix	0 - 65 % Brix	± 0.2 %	0.1 %	Contact Hach
2300054	Salinity	0 - 280 ppt	± 0.2 %	0.1 %	Contact Hach
2300053	Brix	0 - 95 % Brix	± 0.2 %	0.1 %	Contact Hach
2300055	Automotive	Glycol: 32 to -50 °F	± 2.0 °F	0.1 °F	Contact Hach
2300052	Brix	40 - 95 % Brix	± 0.2 %	0.1 %	Contact Hach
2300050	Honey	0 - 95 % Brix	± 0.2 %	0.1 %	Contact Hach
