

STEAM PRESSURE REDUCING VALVE

MODEL COSR-21

SELF-ACTUATED PRESSURE REDUCING VALVE WITH UNIQUE PISTON DESIGN

Benefits

Technologically advanced pressure reducing valve for accurate control in process steam systems.

1. Unique Shock-Absorbing Spherical (SAS) piston delivers stable secondary pressure.
2. Valve maintains high accuracy during severe conditions of varying primary pressure and fluctuating flow rates.
3. Unique self-aligning piston design provides for maximum reliability.
4. Unique pilot valve and two-piece main valve designs assure seal tight shut-off in dead end service.
5. Internal screen for pilot valve extends trouble-free service.
6. Designed with PTFE gaskets for inspection ease.
7. Capable of internal secondary pressure sensing for compact space installation.
