Intellical Probes

You can choose from a broad selection of Intellical probes to meet your most demanding laboratory and field applications, for parameters such as pH, Dissolved Oxygen, Conductivity, Total Dissolved Solids (TDS), ORP, Ammonia, Ammonium, Chloride, Fluoride, Nitrate, and Sodium. All Intellical probes are automatically recognized by HQ/HQD meters and maintain calibration data on the probe itself - eliminating the need of recalibration when switching probes between meters.

Special features:

Red Rod pH probes offer exceptional performance and response time across a wide variety of sample types in the laboratory.

Rugged stainless steel outdoor probes are extremely practical for on-site analysis. Thanks to the digital technology, they can be used with cables up to 30 metres long.

The LBOD probe utilises optical technology to provide fast, accurate Dissolved Oxygen measurements while dramatically reducing maintenance costs.

- Designed for water & industrial QC testing
- Smart sensors embedding calibration data and history
- A complete portfolio for Laboratory and field use
- Exceptional performance and response time across a wide variety of applications and sample types
- For measuring pH, Dissolved Oxygen (DO), Conductivity, Total Dissolved Solids (TDS), Ammonia, Ammonium, Fluoride, Nitrate, Sodium, BOD, and RedOx (ORP).

Part Number	Parameter	Probe Type	Sensor material	Electrode Type	USD Price
PHC10101	pH	Standard	Epoxy	Non-Refillable Gel Reference Element	Contact Hach
CDC40101	Conductivity	Standard	Noryl	Conductivity Cell; 4 Poles - Graphite	Contact Hach
PHC20101	pH	Standard	Epoxy	Non-Refillable Gel Reference Element, semi-liquid gel	Contact Hach
LDO10105	Dissolved Oxygen	Rugged	Polycarbonate / ABS / Stainless Steel	Luminescent Dissolved Oxygen	Contact Hach
LDO10101	Dissolved Oxygen	Standard	Polycarbonate / ABS	Luminescent Dissolved Oxygen	Contact Hach
