Application: Flow control of burning or combustible gases such as natural gas, propane and bottled gas. Fitting is designed as an alternative to the "drop lever" valves used for low pressure gas applications in the United Kingdom and other markets.

Mounting: Turret base with locator pins.

Valve Bodies: Straight pattern forged brass.

Headworks: Quarter-turn ball valve construction with chrome plated brass balls and molded PTFE seals. Valves lock in closed position.

Handle: Spring-loaded molded nylon handles. Handles lock in closed position. Handles must be pulled up to unlock and turned to open valves. Handle alignment indicates if valves are open or closed. Handles are color coded and marked per EN 13792.

Inlet: Furnished with G1/4 mounting shank, locknut and washer. G1/4 male inlet.

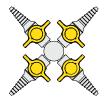

Outlet: Integral (nonremovable) serrated hose end.

Quality Assurance: Fitting is fully assembled and factory tested prior to shipment. 8.5 bar (125 PSI) test pressure and 5 bar (75 PSI) maximum working pressure.
