

Articulated wheel loader with telescopic boom

The WL60T telescopic wheel loader is equipped with a 102 HP Tier 4 Final turbo-charged Perkins diesel engine delivering best-in-class power and performance, and with the telescopic boom additional height, added versatility and greater production is achieved. The WL60T features a telescopic arm that delivers

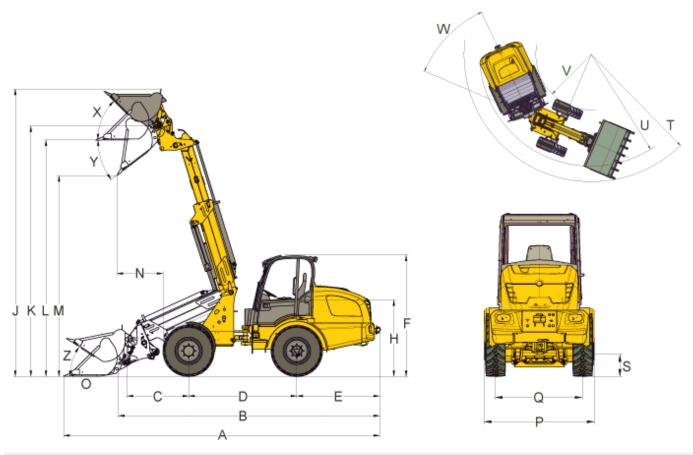

16' 8" hinge pin height to easily manage high sided trucks and material containers. The articulated wheel loader provides stable and maneuverable operation especially in tight spaces.

- Tier 4 Final Perkins engine offers a Selective Catalytic Reduction (SCR)/Diesel Oxidation Catalyst (DOC) as an aftertreament which requires no diesel particulate filter, no regeneration and no maintenance
- The spacious climate-controlled cab features multiadjustable air-ride seat, impressive 360° visibility along with ergonomically designed joysticks and controls to maximize operator comfort
- Excellent service access with side tilting cab and rear engine hood minimizes time to perform daily maintenance and periodical service resulting in more time on the job
- Class leading travel speeds up to 24.9 mph (optional) shortens travel time across job sites, improving cycle times
- Universal hydraulic attachment plate with standard 26 gpm auxiliary hydraulic flow accommodates most existing skid steer attachments
