**Aquifer® Refine**  
Water purification system with KOHLER Connect.

THE BOLD LOOK  
OF **KOHLER®**

# Aquifer® Refine water purification system with KOHLER® Konnect

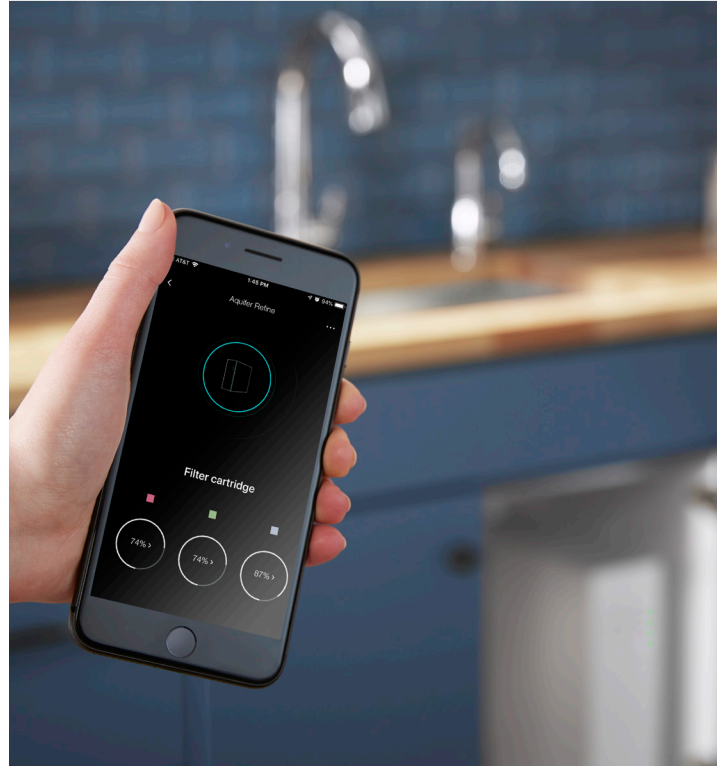

## Moments made better

Feel confident with every sip that you are getting nothing but the best for you and your family. The Aquifer Refine™ water purification system with KOHLER Konnect® voice-activation technology effectively reduces contaminants including bacteria, virus, lead, mercury, chlorine, select pharmaceuticals, volatile organic compounds (VOCs), and more in your cold water.

While many other systems use coal-based filters, Aquifer Refine uses three recyclable filters: two carbon block filters and an ultrafilter. Under-sink installation is fast and easy, and the compact Aquifer Refine system fits alongside garbage disposals and household items stored below the sink.

## Features

- Three-stage water purification system with KOHLER Konnect lets **you ask Amazon Alexa or Google Home** about your water usage and filter life
- Reduces contaminants such as bacteria, virus, lead, mercury, chlorine, pharmaceuticals, VOCs, and more
- To ensure the system continues to reduce contaminants effectively, it is recommended to replace the filters every 6 months
- AC-powered operation; no batteries to replace. (Requires AC power outlet)
- Provides up to 792 gallons, or the equivalent of over 5,800 16.9 fl oz bottles of water (based on rigorous testing to NSF standards)
- 0.65 gpm (2.46 lpm) maximum flow rate at 60 psi (4.14 bar)
- Recommended for use with beverage faucets, such as Wellspring® beverage faucets
- Innovative sensor monitors water usage and displays that information on the KOHLER Konnect app
