

HomeWater Quality Multi-Parameter Sondes HYDROLAB Series Sensor  
**HYDROLAB Conductivity Sensor for HL Series Sonde**

## Specifications

### Technical Attributes

## HYDROLAB Conductivity Sensor for HL Series Sonde

Product Number: HLCOND

Price: Contact Us

The HYDROLAB conductivity sensor uses four graphite electrodes in an open cell design to provide extremely accurate and reliable data with very low maintenance. The sensor is used to measure specific conductance, salinity, total dissolved solids (TDS), and

resistivity.

(accessory cannot be purchased as a standalone product)

*Parameters Measured	Conductivity Raw conductivity Specific conductivity Salinity TDS
Accuracy	±0.5% of reading + 0.001 mS/cm
Compatible Instruments	HL4 & HL7
Housing Material	Plastic sensor housing
Measuring Range	0 - 100 mS/cm
Measuring Range Depth	200 m
Methods	SM 2520-B Standard Methods for the Examination of Water and Wastewater
Operating Temperature Range	+23 - +122 °F (-5 - +50 °C), non-freezing
Resolution	0.001 mS/cm
Sample probe	N.A.
