

Be Right™

# Keep Toxins at Bay

Now there are **more ways** to detect toxic events in your wastewater.

## Detect toxicity at your food plant.

Act fast to keep sludge healthy and avoid biocide kills in your wastewater. Choose your best solution today:

### Lab / Field

#### LuminUltra Photonmaster Luminometer

- Quickly measure microbes in fluids and solids to maintain living cell counts
- Rugged and portable

#### SL1000 PPA

Quick and safe measurement of peracetic acid (PAA)

#### Toxicity ToxTrak™ Test

Identify toxicity levels in water samples

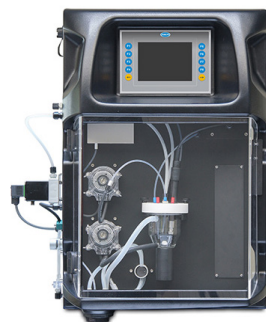

#### Quarternary Ammonium Reagent Set

Avoid overdosing "quats" using Hach colorimetry

### Online

#### EZ Series Toxicity EZ7900 Series Analyzers

- Protect microorganisms from toxic events with automated respiration analysis
- Measures every 10-15 min
- Monitor multiple streams

#### EZ Series ATP EZ7300 Series Analyzers

- Online monitoring of microbial load in water via ATP
- Differentiate between living and non-living biomass

#### Differential ORP Sensor

Continuously trend biocide activity
