# SP5014 SERIES STUMPCUTTER

SP5014 Self-Propelled

The **SP5014** series is a four-wheeled self-propelled unit designed to deliver maximum cutting power in hard to get to areas. A unique dual speed ground drive system allows the SP5014 to travel faster than any other stump cutter in its class. The SP5014 features heavy-duty construction, hydraulic steering and four-wheel stance. This compact unit has a width of just 35 inches, allowing it to fit through standard backyard gates. The SP5014 is designed to maximize production and profits, while minimizing downtime.

A long list of **Optional Equipment** is available, including wireless remote, 4 wheel drive, and hydraulic scrape blade.

**Carlton's Two Stage Drive System** delivers more of the engine power direct to the cutting head.

SP5014 Series – refined for over 25 years!

**Proprietary Dual Motor Drive** eliminates troublesome chains, axles, and axle bearings.

[www.stumpcutters.com](http://www.stumpcutters.com)

**Optional dual wheels are easily removed with one bolt allowing access to tight areas.**

**Hydraulic steering allows precise control and operation while minimizing operator fatigue.**

**Optional razor cutting system cuts faster, extends tool life, and makes changing teeth quick and easy.**

**Hydraulically controlled scrape blade provides ability to spread or move chip piles — making quick work of clean up.**

The **SP5014 TRX** has all the features of the SP5014 with the addition of a retractable track system. The track drive system offers exceptional tractive effort - allowing the SP5014 TRX to easily climb chip piles and obstacles. The tracks on the SP5014 TRX retract from a wide 48 inches to a narrow 35 inches to fit through a standard backyard gate. A hydraulic controlled scrape blade is standard equipment on the SP5014 TRX

• A variety of **powerful engine options** are available to take on the toughest jobs.

• **SP5014 TRX** is the perfect machine when access is the primary concern.

• **Tapered Bearings** on cutter wheel and jack shaft provide long service life and reduced maintenance.

Over 60 years and 15,000 machines of experience!

**Optional wireless remote control increases operator's visibility and reduces fatigue.**

**Tracks expand and contract hydraulically from a wide 48 inch stance to gate accessible narrow 35 inch width.**

**Proprietary dual motor drive system eliminates chains, axles, and axle bearings while providing class leading ground speed and climbing torque.**

**Feather touch hydraulic controls make the SP5014 Series easy to operate and provide optimum user control.**

Carlton's Razor Cutting System is simply amazing. The low profile holder design coupled with the large carbide faced teeth provide a high cut to friction ratio – this translates into highly efficient large cuts with minimal chip scatter. The Razor teeth utilize a thick carbide face which resists shattering and an extra hard fine grain carbide which resists wear. This is the most efficient system on the market – minimizing both cutting and cleanup time.

# SP5014 SERIES STUMPCUTTER

	SP5014	SP5014TRX
Engine Option 1	Vanguard Big Block 993 CC	
Engine Option 1 Performance	35 Horsepower 52 ft.-lbs.	
Cutting Depth Below Ground	14"	
Cutting Height Above Ground	34"	
Cutter Head Swing	50"	
Cutter Wheel Thickness	1 1/4"	
Number of Teeth on Cutterwheel	36 Razor Teeth	
Type of Cutter Teeth	Hard Micro Structure Carbide	
Jack Shaft Bearing Size	1 11/16"	
Cutter Head Bearing Size	1 11/16"	
Fuel Tank Capacity	10 Gallons	
Hydraulic Tank Capacity	4 Gallons	
Track Width	NA	7"
Track Length	NA	42"
Tire Size	5.7 x 8	NA
Ground Pressure	8.6 PSI	4 PSI
Machine Width - Wide Stance	48" with duals	48"
Machine Width - Narrow Stance	35"	35"
Machine Height	58"	56"
Machine Length	108"	95"
Machine Weight	1650 lbs.	2215 lbs.
