

Be Right™

# We've Got our Eyes on You, Microbes.

Now there are **three ways** to spot ATP in your plant.

## Catch microbes before they slow you down.

Better CIP, safer surfaces, and less contamination for your food or beverage plant.

### Lab

#### Luminaise™ Swabs for Surface ATP

Fast, Easy, and Portable

- Swab test any surface
- Detect bacteria, yeasts, and molds
- Anyone can perform
- Reagents stable for one year

### Field

#### LuminUltra Aqueous ATP Test Kits

10 Minute Assessment

- Detect all microorganisms
- Address taste and odor issues
- Use with fluids
- Correlate to CFUs or HPCs

### Online

#### EZ7300 ATP Analyzer

Auto ATP Every 10 Minutes

- Ensure sufficient CIP
- Control biocide programs
- Run grab samples
- Monitor up to eight streams
- Programmable test frequency
